Summary: (machine translated) Forbidden because of the reservoir.		
Hydrology:		
Access: (machine translated) From Bellinzona or from the Gotthard Pass to Biasca. From there, take the country road to the right of the highway in the direction of the Gotthard as far as Bodio. In Bodio turn left to Personico. Cross under the highway, then take the village road through Personico, then drive out of the village in the direction of Biasca, passing a grotto on the right after about 300 meters. Shortly after a workshop on the left, the road crosses the stream. Park one car there. Take the second car back to Personico and in the village, after a striking 90° bend to the right followed immediately by a left-hand bend between these two bends, turn left uphill at an acute angle. Follow this road up to the reservoir.		
Approach: (machine translated) In the middle of the dam, on the downstream side, you can see a tiny cottage. To the left of it there is a door in the wire fence. Here first on some steps down towards an old dilapidated stone bridge. To the left of it on the brick dam foundation to the exit of the foundation, then descend to the right over boulders to the deepest point. From here rope in.		
Tour: (machine translated) Relatively short canyon with beautiful rappels. Problematic is that even in the event of a malfunction of the power plant, the not exactly little water from the upper Riarna is directed past the small reservoir into the canyon and that too automatically. This means a deadly and incalculable danger.		
Return: (machine translated) After the last waterfall, swim across the pool and climb along the left rock wall. Return to the car along the path.		
Coordinates: Canyon Start 46.3625 8.9238 Canyon End 46.3654 8.9252
