Summary: (machine translated)
Relatively open forest gorge

Hydrology:

Access: (machine translated)
In Geneva (after the border), we join the A 40 highway (Autoroute Blanche) in the direction of Lyon. We drive on this highway for about 75 km. We come to a highway junction and drive another 9 km in the direction of Lyon (A 42). Then we leave the highway and drive to Amberieu-en-Bugey. On reaching the outskirts of the town, we turn right onto the D 1075 (formerly the N 75).
After driving about 2 km in a south-westerly direction, this road turns left at an elaborately constructed junction in an easterly direction (straight ahead is the D 1084). We continue for less than 8 km and then turn east at a traffic circle towards Vaux-en-Bugey. In this town, we take the D 60 A in the direction of Cleyzieu. From the center of the village, we drive straight on for about 4 km in a SSE direction. The road then turns east. After this change of direction, there is a dirt road coming up from "our" stream, opposite which is a parking bay where we park the lower vehicle.
We continue with the other vehicle; the road now climbs slightly and quickly gains height in a few hairpin bends. At the top, we turn right at a T-junction instead of left towards Cleyzieu. After a few hundred meters we reach the road bridge over the stream. Park the top vehicle here.

Approach: (machine translated)
We go downstream, first the forest path on the orographic left bank, then in the streambed and after a few minutes we come to the first rappel.

Tour: (machine translated)
Not unattractive canyon when water flows. Comparatively open with a longer walking passages on a path on the left bank after the third higher rappel (C 16).

Return: (machine translated)
The exit from the gorge ends at a small brick water intake. From here, take the forest path that initially runs to the left of the stream, later crosses it and reaches the tarred road for the first time at the lower vehicle.

Automatisch importiert von Descente-Canyon.com für Canyon Buizin Beaucoup d'arbres tombés dans la première partie, cela gène un peu la progression notamment avant la première cascade. Oublié un mousqueton sur le relais de la 2ème cascade. Automatisch importiert von Descente-Canyon.com für Canyon Buizin Raté malgré les fortes précipitations de la semaine pas d'eau dans le canyon. Canyon très encombré par des chutes d'arbres. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/2168/observations.html)

Almost dry after the rain, but the game was to keep dry bcs the pools did not invite. Possible to do without wetsuit. For sure, very secondary to Rheby which we did in the afternoon and had clear water.

Automatisch importiert von Descente-Canyon.com für Canyon Buizin Déjà sec, rien ne coule au moins jusqu'à la presque fin. Coincé la corde dans la cascade C3-C16 en tentant le rappel direct du haut (j'aurais dû plus lire avant commentaires et légendes de photos sur DC..). Remontée pénible RG sur terrain pas toujours très rassurant pour récupérer la corde et ça m'a suffi. Du haut de la C3-C16, il y a une espece de via corda bien raide RD qui ramène a la route puis au pont de départ. Peu d'intérêt quand sec comme aujourd'hui, mais on devine que les rappels doivent être beaux en eau. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/2168/observations.html)

Automatisch importiert von Descente-Canyon.com für Canyon Buizin Rien ne coule sauf à la fin, descendu pour faire de la formation technique , pas vue la signalétique aux sujets des écrevisses rouges, gros nettoyage des combinaisons impératifs. Automatisch importiert von Descente-Canyon.com für Canyon Buizin Des beaux rappels ! Fait sans navette depuis le bas. Le chemin d'approche après la cascade est en mode sanglier ! On monte rive gauche un peu au hasard, jusqu'à trouver une petite sente qui fait de la ligne de niveau jusqu'au départ. Automatisch importiert von Descente-Canyon.com für Canyon Buizin Equipement ok. La marche dapproche sanglier le long du canyon n’est franchement pas un plan ! Mieux vaut faire du stop ou prendre le sentier plus haut. Frottements à gérer et attention au rappel de corde qui peut bloquer parfois. Ail des ours :) (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/2168/observations.html)
