Ruisseau de la Mine

Create: 2023-03-09 20:52:08	Update: 2023-10-14 09:16:12	Print: 2025-04-28 07:04:18
Country: France Region: Auvergne-Rhône-Alpes Subregion: Haute-Savoie Town: Doussard		
Difficulty: difficult	Grading: v5 a3 IV	Total time: 3h30
Approachtime: 50min	Tourtime: 2h30	Returntime: 10min
Altitude entry: 950m	Altitude exit: 730m	Delta Altitude: 220m
Canyon length: 300m	Highest rapell: 41m	Amount rapells: 11
Transport: Car optional	Rock type:	drainage area: km²
Season:	Orientation: East	Best Time:
Rating: ★ 3.5 (3)	Info: ★ 2 (1)	Belay: ★ 3 (1)
Specialities:		
Gear: Ropes: 2x45m		
Summary: (machine translated) Rappel canyon, attractive, also because of the views		
Hydrology:		
Access: (machine translated) From Annecy on the N 508 along the southwest shore of the lake of the same name via Duingt to the south end of the lake at Bout-du-Lac (17 km from Annecy). 2 km further on (i.e. after 19 km from Annecy), the D 909 branches off to the left in a northerly direction to lead to Talloires on the eastern shore of the lake. However, we turn south in the exact opposite direction, then drive through Doussard in an easterly direction and continue in a southeasterly direction to Saury (about 3.5 km from N 508). Here we park the car near the bridge. A half-hour (16.5 km) transfer is also possible, see https://www.google.de/maps/dir/Association+Jeunesse+Feu+Vert/45.7758606,6.1878988/@45.7933701,6.1729808,13.56z Then it's about a 30 min walk to the entry.		
Approach: (machine translated) From the bridge we take the tarred road uphill in a southerly direction for a few meters, but then immediately turn right onto a dirt road that leads uphill on the left past a house at the edge of the forest. We then follow the subsequent footpath over a footbridge (below the mine) in a northerly direction and reach a wide road. Continue uphill on this in switchbacks until we approach the canyon in a southwesterly direction. Where the road (at about 970 m above sea level) describes a bend to the right (on the left below the mast of a power line), a path leads southward steeply down into the streambed.		
Tour: (machine translated) Attractive tour (without running trails) that continuously opens views of the wooded valleys. Good to combine with Fontaine Fayard, Montmin or Frontenex.		
Return: (machine translated) At the water intake, turn right and follow the serpentine path down to the already known footbridge and then return to the car on the approach path.		
Coordinates: Canyon Start 45.7680 6.1870 Canyon End 45.7660 6.1918 Parking Entry and Exit 45.7651 6.1955 Parking at Entry 45.7758 6.1880

2024-12-17 | System User | |📖|📌|🌊 Normal | 🟢 Completed

Automatisch importiert von Descente-Canyon.com für Canyon Mine La Phase d'approche est assez longue avec beaucoup de dénivelé Le pont traversant le ruisseau est complètement détruit il faut passer dans le lit du ruisseau pour traverser (passage pas difficile) La descente c'est bien déroulé en duo Debit correct Léger courant dans la vasque avant le rappel de 42 metres qui nous entraîne sous la cascade (Prévoir la bonne longueur de corde pour ne pas être gêné dans celle ci avec le mou)Retour sans difficulté (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2141/observations.html>)

Automatisch importiert von Descente-Canyon.com für Canyon Mine Équipement ras sauf mono point avec sangle rouge vieillissante (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2141/observations.html>)

2024-10-07 | System User | |📖|📌|🌊 Normal | 🟢 Completed

Automatisch importiert von Descente-Canyon.com für Canyon Mine DC+, pas de problème aquatique à ce niveau. Certaines parties sont très glissantes notamment dans l'approche du relai de la C30 et de la C40. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2141/observations.html>)

2024-09-16 | System User | |📖|📌|🌊 Normal | 🟢 Completed

Automatisch importiert von Descente-Canyon.com für Canyon Mine Équipement Ras, DC+ mais ça passe bien au contraire c' est plutôt sympa avec de l'eau.La sangle rouge d'un des relais en complément d'un mono point mériterait d'etre remplacée.Pour info, le joli pont en bois que l'on traverse à droite au début de l'approche est complètement effondré. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2141/observations.html>)
