Season:	**Orientation:**	**Best Time:**
Rating: ☆ 0 ()	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialities:

Gear:
Ropes: 2x 80m

Summary: (machine translated)
No details

Hydrology: (machine translated)
Equipment for the Grand Cassé a little far from the water.

Access: (machine translated)
If you are coming from St. Denis, at the entrance to St. Benoit, take the D53 towards Abondance and continue towards the Takamaka power station. Park just before the bridge that crosses the canyon, near the kiosks. The last waterfall of Dudu Sup can be seen from the parking lot, with signs indicating a large canyon.

Approach: (machine translated)
See topographic view Ric à Ric.
The trail follows the ridge that runs to the right of the canyon almost continuously.

Tour: (machine translated)
See topographic view Ric à Ric.

The equipment is generally in order, all relays are linked, some of the old, heavily rusted equipment is still present...

Differences to the topographic view from 05.08.11:
R3 - the single point is duplicated
R8 - 1 single point from MC has been sensibly placed to link up and reach the relay safely.
R9 - + 1 point from MC and 1 at the relay. Many of the old points are rusted and crushed, unfortunately they cannot be dismantled, they are lying around everywhere!
R13 - + 1 point
R14 - + 1 point There were already several, but as explained above, the steel bolts are broken.

Return: (machine translated)
Clear path in RG to return to the kiosks

Coordinates:
Canyon Start -21.0743 55.6237
Canyon End -21.0712 55.6325

Automatisch importiert von Descente-Canyon.com für Canyon Dudu Sup pour cause de pluie, nous ne sommes pas rentrés dans le canyon. une fois le debut de la sente trouvée (30 m avant le pilone puis tout de suitea droite), c est bien tracé jusqu'au bout (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/22700/observations.html)

2026-06-08 | System User | |🕮 |⚓ | ≋ Normal | 👍 Completed
Automatisch importiert von Descente-Canyon.com für Canyon Dudu Sup Approche bien marquée. La trace GPX de la FFME est fausse au départ. Une sente 50m avant le pont en amont de Dudu marque le début de l'approche. C'est raide mais pas difficile. Attention tout de même où l'on pose les pieds.Descente propre car l'équipement est en très bon état. Point d'attention au R12 où la communication visuelle et sonore est impossible avec R13. Bien briefer sur la marche à suivre : ça n'est pas agréable d'être dans le doute depuis le haut comme le bas. Sinon, très belle descente. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/22700/observations.html)

2025-11-25 | System User | |🕮 |⚓ | ≋ Normal | 👍 Completed
Automatisch importiert von Descente-Canyon.com für Canyon Dudu Sup DC mais qui avait déjà baissé en fin de journée Sente d'accès okÉquipement renforcé (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/22700/observations.html)
