Specialities:

Gear:

Summary: (machine translated)
Simple canyon that would serve to initiate in this sport but that has somewhat precarious facilities. The best thing, the environment

Hydrology:

Access: (machine translated)
We will have to be located in Arouca, in the province of Aveiro.
From here we head towards Moldes on the CM1251 and follow this road to the south, Bustelo, Adaufe, Cando, Candal. After passing the latter we arrive at the exit bridge of our descent. We park the return car or if we only have one.
In case of having an access car we will continue along the road for almost 2kms until a gentle left curve with a high voltage pole on the right. Here we leave the access car

Approach: (machine translated)
From the high voltage pole, we follow the line to go down to the river.
If we have the car down we can walk up the road or take advantage of some of the tracks to shorten the ascent.

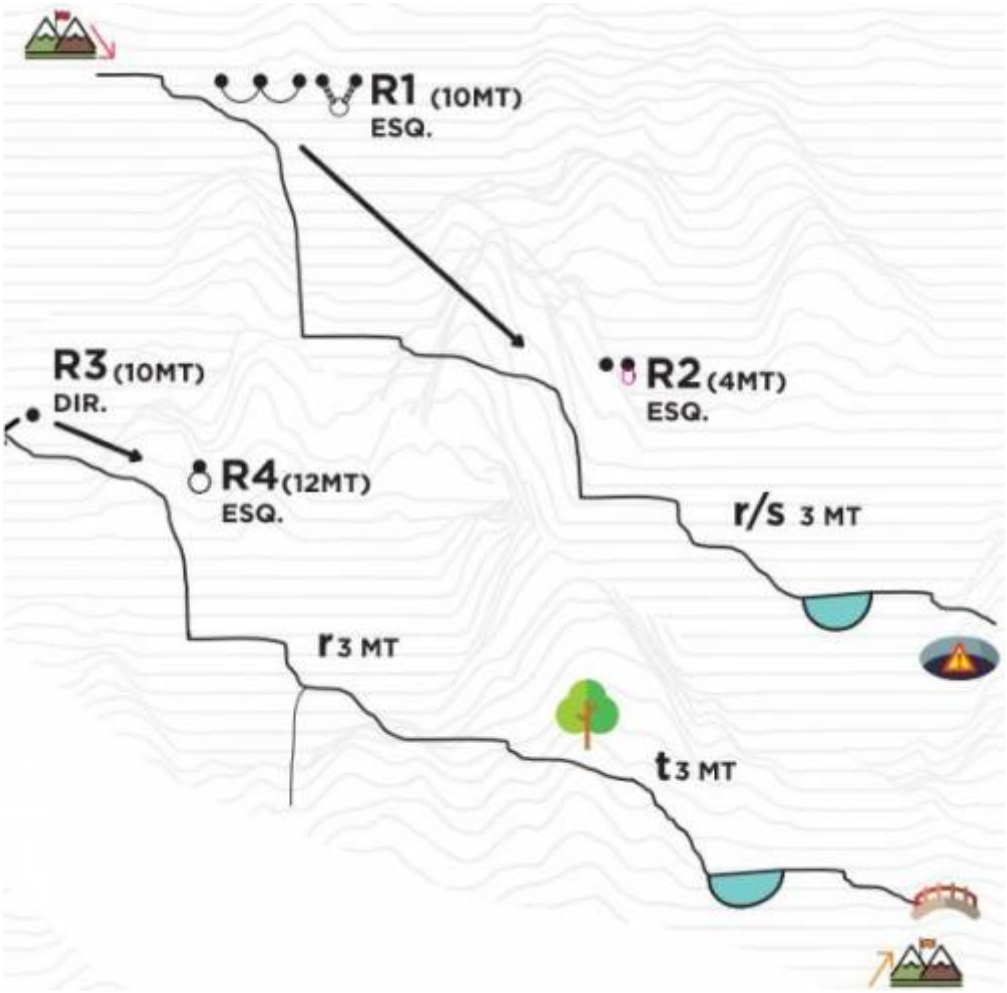

Tour: (machine translated)
See mole.

Return: (machine translated)
We arrived at the bridge where we parked.
