| Summary: (machine translated) Mainly river walk; according to the drawn topographic view in the mentioned book and the description there, disappointing descent in open terrain, although the river in its naturalness is not without charm. | | |
| Hydrology: | | |
| Access: (machine translated) From Santiago de Compostela on the C 543 in the direction of Noia. After 11 km, in Betamirans, turn right (north) towards Negreira (about 10 km). In Negreira westwards in the direction of Outes. After 9 km (just before the village of Barbazan, which is a little to the left of the road) you will come to a bridge over the Corzan. Park the car here. | | |
| Approach: (machine translated) It is best to rappel directly from the bridge into the streambed, since the access above the bridge is tedious and not rewarding because of the maquis. | | |
| Tour: (machine translated) 6 rappels, mostly optional, slides and possible jumps | | |
| Return: (machine translated) Shortly before reaching Río Tambe out to the left and as far as possible on the logging roads across the deforested areas back to the road and the car. An alternative for 2 vehicles is described in the topoguide mentioned above. | | |
