<b>Altitude entry:</b> 660m	<b>Altitude exit:</b> 610m	<b>Delta Altitude:</b> 50m
<b>Canyon length:</b> 900m	<b>Highest rapell:</b> 10m	<b>Amount rapells:</b> 2
<b>Transport:</b> on Foot	<b>Rock type:</b>	<b>Drainage area:</b> 110.00km <sup>2</sup>
<b>Season:</b> June - September	<b>Orientation:</b> Northeast	<b>Best Time:</b>
<b>Rating:</b> ★ 3.2 (3)	<b>Info:</b> ★ 2 (1)	<b>Belay:</b> ★ 3 (1)
<b>Specialities:</b>		
<b>Gear:</b> Ropes: 1x 30m		
<b>Summary:</b> (machine translated) 2nd canyoning section of the Estéron, also aquatic, but also varied. Something for aesthetes.		
<b>Hydrology:</b>		
<b>Access:</b> (machine translated) From Nice on the N 2002 about 23 km along the Var north up to the Pont Charles Albert, then turn onto the RD 17 in the direction of Roquesteron (coming from Nice at the bridge still continue to the next traffic circle and then back to the bridge). We come up to Gillette, then drive in the valley of the Esteron winding westward over Roquesteron up to Cigale, over the Riolan canyon then northward up to the Pont des Miolans. After this bridge turn left onto the RD 2211a and to Collongues. From here, continue west on the D 84 for about 1 km until the road to the village of Mujoules turns off to the left. Park your car in the large parking lot in front of the village (72 km from Nice). Car transfer is also possible. To do this, park the upper vehicle in Gars and walk downhill along the footpath in the opposite direction to the entry.		
<b>Approach:</b> (machine translated) South to the saddle below the village (745 m a.s.l.) and beyond down the footpath (GR 4). You come to some houses (hamlet of Peironas) above a large meadow area. Take the dirt road below the left house (direction WSW) to the left, then descend the dirt road to the right and follow it downhill until you reach the suspension bridge over the Esteron River. Go over it and straight on; then follow the path up to the right towards Gars (via Vilette). When you reach the height (770 m a.s.l.), go down beyond and take the track to the right at the signpost. It leads to the entry at the beginning of the gorge.		
<b>Tour:</b> (machine translated) As with the St. Auban, the Riolan and the Aiglun, you should be lucky to be able to make the descent in clear water. The canyon is varied and impressive. The ground was not slippery in 2023. There are no emergency exits.		
<b>Return:</b> (machine translated) After the end of the canyon (remains of an old canal on the left, through which you can get out crawling) exit left and follow the Esteron on its left bank for a good distance. You will then come across a dirt road, which you follow to the right. At marker 69, take the forest path up to the left (north). You will come back to the houses of Peironas and from there up to Mujouls. If you have missed marker 69, the track comes to the large meadow, on the northern edge of which you can see the houses of Peironas; then across the meadow there.

Automatisch importiert von Descente-Canyon.com für Canyon Mujouls Fallait pas plus d'eau bonne journée avec marche d'approche ça pousse dans la seconde partie. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2158/observations.html>)

2026-06-11 | System User | |📖|📌|🌊 Normal | 🟢 Completed

Automatisch importiert von Descente-Canyon.com für Canyon Mujouls Parcouru en aller retour depuis le haut. Ça demande de fixer la corde au plus grand rappel et quelques compétences en escalade et eau-vive. On a fini crevés mais contents. Très glissant avec une vilaine couche de limon qui a valu quelques chutes (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2158/observations.html>)

2026-04-29 | System User | |📖|📌|🌊 Crazy | 🟢 Completed

Automatisch importiert von Descente-Canyon.com für Canyon Mujouls Grande prudence dans la deuxième partie, beaucoup de mouvements d'eau en cette période ! (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2158/observations.html>)

Automatisch importiert von Descente-Canyon.com für Canyon Mujouls Seul au monde, et le soleil était de la partie (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2158/observations.html>)

2025-08-17 | System User | |📖|📌|🌊 Normal | 🟢 Completed

Automatisch importiert von Descente-Canyon.com für Canyon Mujouls Une bien belle découverte. Petite descente très esthétique, les cascades de tuf sont superbes. Journée bien remplie avec la marche aller et retour + la route. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2158/observations.html>)

2025-08-09 | System User | |📖|📌|🌊 Normal | 🟢 Completed

Automatisch importiert von Descente-Canyon.com für Canyon Mujouls PFE au début, puis débit correct après les cascades de tufs. Fait sans le haut de combi, même si après les affluents l'eau est moins chaude. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2158/observations.html>)

2025-07-31 | System User | |📖|📌|🌊 Normal | 🟢 Completed

Automatisch importiert von Descente-Canyon.com für Canyon Mujouls Magnifique clue ! conditions parfaites ! (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2158/observations.html>)

2025-06-21 | System User | |📖|📌|🌊 High | 🟢 Completed

Automatisch importiert von Descente-Canyon.com für Canyon Mujouls Seuls au monde... 😊 ( départ 13h ) (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2158/observations.html>)

2024-09-18 | System User | |📖|📌|🌊 Normal | 🟢 Completed

Automatisch importiert von Descente-Canyon.com für Canyon Mujouls DC mais plutôt faible si on se réfère aux laisses de crue sur les parois. Beaucoup de mouvements d'eau visibles et d'embacles. Tout passe très bien mais attention lorsqu'il y a plus d'eau. Eau un peu laiteuse sûrement dû aux pluies de la veille. Sinon magnifique canyon, avec les tufs on se croirait presque dans un autre pays. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2158/observations.html>)

2024-08-25 | System User | |📖|📌|🌊 Normal | 🟢 Completed

Automatisch importiert von Descente-Canyon.com für Canyon Mujouls Ras ,débit faible pour l'éstéron ...La main courante est en place et le rappel suivant est équipé avec une corde très très longue et un peu douteuse .Nous avons perdu un appareil photo lumix orange dans le bouillon au niveau du tunnel en fin de canyon ...on ne sais jamais ... (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2158/observations.html>)
