Hydrology:

Access:

Approach:
Take the CAI515 path until you reach the Val delle Monache riverbed at an altitude of 870 m.

Tour:
The descent was smooth, except for finding a sling on a small drop, proving we weren't the first to have the idea of going there. After a pleasant walk on gravel, we reached the riverbed and walked through the narrow gorge, which, although steep and beautiful.
Once we reached a particularly steep and well-worked section, we encountered the second (and last) abseil after the sling.
Armed, of course!
After the waterfall, the gorge opened up and ended.
