Country: France **Region:** Bourgogne-Franche-Comté **Subregion:** Doubs **Town:** Mouthier-Haute-Pierre		
Difficulty: a little difficult	**Grading:** v4 a2 II	**Total time:** 3h
Approachtime: 45min	**Tourtime:** 2h	**Returntime:** 15min
Altitude entry: 620m	**Altitude exit:** 390m	**Delta Altitude:** 230m
Canyon length: 600m	**Highest rapell:** 50m	**Amount rapells:**
Transport: on Foot	**Rock type:**	**Drainage area:** km²
Season:	**Orientation:**	**Best Time:**
Rating: ☆ 2.8 (1)	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialities:

Gear:
Ropes: 2x 50m

Summary: (machine translated)
Raw data import from Descente Canyons https://www.descente-canyon.com/canyoning/canyon/2410

Hydrology: (machine translated)
Possible all year round, but canyoning is prohibited from February 15 to June 15.
In very cold winters, ice cascades can occur!

Access: (machine translated)
From Ornans, drive to Lods and then to Mouthier-Haute-Pierre. At the entrance to the village, take the first road leading down to the Loue towards the campsite. Park in the canoe parking lot.

Approach: (machine translated)
From the parking lot, take the GR that climbs up to Chatelet.

Tour: (machine translated)
A series of waterfalls that are not surrounded by rock faces. Relays in the form of ropes and chain links around the trees.

You can bypass the first waterfall by 50 m by taking a vague path to the left in the first hairpin bend of the GR after crossing the road. You then walk along the road from above, past the road shelters. An escape is possible on the other side.

The part below the road is closed to canyoning in order to protect the tufa concretions.
The Natura 2000 biotope regulation prohibits climbing and canyoning on the Baume rock face and the Syratu waterfalls from February 15 to June 15.
You are hiking on very sensitive tufa, so please be careful... A very beautiful descent that must be protected and respected!
This descent can serve as an abseil point after climbing La Baume rock.

Return: (machine translated)
Follow the road towards the source of the Loue to rejoin the path used during the approach.

Coordinates:
Canyon Start 47.0354 6.2882

Automatisch importiert von Descente-Canyon.com für Canyon Syratus Attention la marche d'approche est assez compliqué a comprendre. A partir du parking Milouf (lieux de stationnement) monter dans la ville ensuivant le GR arriver dans la ville prendre a droit route de gorges de nouailles.Continue sur la route puis prendre a gauche rue du petit mont.A l'entrée de cette rue se trouve une petit source d'eau potable.Monter le rue prendre la première a droite en direction de la source de la loue. il s'agit d'un sentier de randonné qui monte durant 25 minutes. Arrivé en haut du sentier vous allez arrivé a une carrière avec un panneau vous expliquant qu'il faut traversé la champs et puis continué sur 150 mètres (dans mes souvenir).Si vous continué vous arriverez au début des cascades de Syratus.Il vous faudra simplement descendre a coté du lit de la rivière pour arrivé au premier rappel de 50 mètres.Le canyon est composé de 3 rappels R50,R25 et R35L'ensemble des encrage se trouve sur les arbres et sont de bonne qualité.
