| Summary: (machine translated) Very beautiful open and vertical lime canyon with views into the Bluntau valley; clean cold water; short rappel canyon with a kl. narrow section; several rappel points can be rappelled alternatively outside the water flow. !large catchment area | | |
| Hydrology: | | |
| Access: (machine translated) Coming from the A10 take the exit Golling and drive in the direction of the train station --> before the train station you drive over the tracks and bridge that leads over the Salzach --> immediately after the bridge on the left continue into the Bluntautal --> you follow the road to the bridge after the first large parking lot for hikers (Attention!!! on weekends and holidays the entrance is only allowed until 10am for cars). --> continue over the small wooden bridge and the forest road at walking pace to the Bärenwirt --> park at the Bärenwirt parking lot. | | |
| Approach: (machine translated) From the Bärenwirt follow the forest road over the bridge in the direction of Jochalmen --> after approx. 15 min. you will come to a small border hut --> at the fork in the road turn left in the direction of the waterfall --> after a short while you will cross a stream --> then continue to follow hiking trail 451 up through the forest (also possible via forest road) --> after approx. 10/15 min. you meet the forest road again --> here you take a shortcut over a steep forest road until you are back on the forest road again --> you follow this until the end --> at the point where the forest road ends, it is best to put on the neoprene and harness --> the entry is in the course of the forest road a little further above and is reached via a well-trodden small path next to the canyon (entry via fixed ropes and abseil point on the tree) | | |

Tour: (machine translated)

The entry into the stream leads over a sling around the tree where you dry rappel about 25m --> arrived in the stream follow three short slides which can also be jumped depending on the water level --> after that you would have a last steep exit possibility on the right before it then goes over an approx. 25m high dry rappel point (with rope traverse) next to the so-called cannon tube in a cavity down --> from the cavity it goes immediately approx. 7m incl. shower over the next mostly very slippery step --> for safety a rope traverse leads to the next chain anchor at the highest dry 30m rappel point in the canyon --> after a few steps there is a narrow point which can be easily passed by a fixed rope traverse --> the next approx. 20m rappel point runs directly in the water and has a small overhang with a sharp edge --> the next 20m rappel point is a small overhang with a sharp edge --> the next 20m rappel point is a small overhang with a sharp edge --> the next 20m rappel point is a small overhang with a sharp edge --> the next 20m rappel point is a small overhang with a sharp edge --> the next 20m rappel point is a small overhang with a sharp edge --> a shallow pool follows (often felt with gravel)--> a short walking passages and small slide follows before one stands at the last cascade--> if the water level allows it, is rappelled here left approx. 15m into a beautiful cavity, followed by an approx. 10m step into the last pool--> alternatively, this cascade can be dry r. approx. 30m rappel--> then follow the shallow streambed mostly on the left side for about 15min. until you see a small wooden hut next to the streambed--> here rappel left out of the stream.

Return: (machine translated)

From the wooden hut via the forest road back to the Bärenwirt (Attention! many MTB).

Automatisch importiert von Descente-Canyon.com für Canyon Fischbach It is a nice, short canyon with an amazing view into the valley. Start with rappelling from the tree (fix rope goes to this tree, you will see it). Really nice cascades. Access: park your car in Parkplatz Bluntatal (I think we paid 7 euros for 1 car), after that, it's 6 km walk (only last part is uphill, approx 30 min). (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/22084/observations.html>)

2024-10-06 | Max H. |★★★★☆|📖★★★★|📍★★★|🌊 High |👍 Completed

Fresh on access and fresh in the stream. Slides no. two and three possible. Communication problems when cutting the rope at the cannon tube. The traverser rope is missing in a narrow section. Final waterfalls with some wumps. (machine translated)

2024-09-07 | Giga |★★★★☆|📖★★★★|📍★★★|🌊 Normal |👍 Completed

Take the wrench with you, a nut from a chain anchor at a non-critical point was loose. Slides only partially feasible. (machine translated)

2024-09-02 | Der Insel Affe |★★★★★|📖★★★★|📍★★★★|🌊 Normal |👍 Completed

All anchors in order. Some of the upper slides are shallow, but almost all are doable. Canyon also possible with 2x30m rope, if you take the long rappel at the belay under fixed ropes. (machine translated)

2024-06-21 | Jason Walker |★★★★☆|📖★★★★|📍★★★★|🌊 Normal |👍 Completed

Fantastic, easy canyon. A shame there's so much leftover anchor material and some below average fixed lines. Very pretty, good dry lines for higher flows, quite slippery. On the 3rd last abseil there were anchors at the bottom to set up a zipline in higher water or for practice.

2024-05-20 | Thomas Fras |★★★★☆|📖★★★★|📍★★★★|🌊 Normal |👍 Completed

two fixed ropes renewed, 1x anchor new, otherwise everything top, large hole in the rock below the cannon tube since 2023, lots of gravel in the pools (machine translated)

2024-04-14 | Max H. |★★★★☆|📖★★★★|📍★★★|🌊 Low |👍 Completed

Water level was low today and also much warmer than usual for the time of year. We have partially renewed anchors in the narrows and set anchors for "emergency crossings" at high water levels. Ropes were replaced at the narrows and before the dome. I think I forgot my Salewa HMS carabiner at the Dom rappel, if it finds its way back to me I would release it for a beer or similar, please/thank you. (machine translated)

2024-03-23 | Jendryan |★★★★☆|📖★★★★|📍★★★★|🌊 Normal |👍 Completed

parking lot is one of the most beautiful in the region. Access does not have to be shortened as described, you can also follow the forest path. The fixed ropes used are in pieces, especially in the narrow section. The stream is commercially guided and therefore very well drilled. The view is gigantic. (machine translated)

2023-11-09 | Daniel Sturm |★★★★☆|📖|📍★★★★|🌊 Low |👍 Completed

See description Christoph. (machine translated)

2023-11-09 | Christoph Cramer |★★★★☆|📖★★★★|📍★★★★|🌊 Low |👍 Completed

Stands in order, fixed rope at the crux now without a sheath. Pools mostly flat. (machine translated)

2023-09-16 | Joey CIA |★★★★☆|📖|📍★★★★|🌊 Low |👍 Completed

Stands all okay. A few fixed ropes belong times exchanged. Super tour! (machine translated)

2023-07-23 | Glitzi |★★★|📖★★★★|📍★★★★|🌊 Low |👍 Completed

All the stands and ropes we have seen are ok. So dry I have not seen the gorge. Sliding is only possible to a certain extent because the gullies are well filled with gravel. As always beautiful! (machine translated)

2023-04-29 | Max H. |★★★★|📖★★★★|📍★★★|🌊 High |👍 Completed

It had rained in the last 24h in Golling 20mm (source <https://bit.ly/3n9vE2T>) thus was "good" water in the stream. At the chute before the gun barrel was a small but unguete roller present, had us 2-3min busy there to get out again but nothing dramatic. What but mMn new is that the gun barrel drilled a hole and now splashes directly on the narrows. This makes the narrows much "more difficult" to cope with high water levels, I would put 2-3 hooks here so that you can cross again above and possibly also change the rope in the narrows.
