Specialities:
Dam (inform operator), Dam (autom. flushing),

Gear:
Ropes: 2x 35m

Summary: (machine translated)
Some nice shorter rappels, huge slides and technical jumps.

Hydrology: (machine translated)
If necessary, water supply from the interconnected reservoir canal leading to the power plant (automatic opening of the sluice in case of problems in the canal or in the power plant, as in the case of the accident in 2001: https://www.nzz.ch/article7KF2C-ld.179745).

Access: (machine translated)
From the freeway junction north of Bellinzona take the N2 towards Biasca. Passing through Claro and Cresciano we reach Osogna (11.4 km from the highway to the bridge over the Nala). After the bridge over the Nala, drive up to the cemetery and leave the car there.

Approach: (machine translated)
On foot:
Walk along the road above the parking lot towards the river and descend to the large terminal basin. Check the water flow, then cross the riverbed to the south and hike along the narrow mountain road to the start of the path to Pönt and Valle di Osogna. After the steep ascent to Pönt, the path becomes flatter and then enters the Valle di Osogna. From bridge 839, the path climbs again. At stone bridge 950, carefully check the water level in the basin below (this can become a trap). Climb the steep steps and at 1060 meters take the less visible path on your left down into the valley to the river and the outlet of the diversion channel.

Helicopter:
From the helipad, first go up to the houses I Cassin di Carli. There we take the hiking trail to the right. After the last houses, the path descends along a ridge. At an altitude of 1060m, we take the not very clearly recognizable path to the right. It leads us down to the entry at the outlet of the drainage channel.

Tour: (machine translated)
The upper part starts after the water intake and accordingly carries little water. The water is generally quite cold. Many slides that need to be well checked out. There are also some possible jumps.

Return: (machine translated)
Either get off at the bridge and go back down the access path or continue in the Nala Intermedio (see there).

About a 15-minute walk downhill from the heliport; follow the blue markings to the entry. Some old anchors and slings. Everything is easily manageable. New rings would be a good idea. With Maria, Bogdan, and Markus (machine translated)

After exactly 2 hours and 15 minutes of access, I entered the water—it was really dry, with a pool of cold water and big fish. The two anchors under the beautiful old stone bridge probably need to be replaced soon. (machine translated)

Automatisch importiert von Descente-Canyon.com für Canyon Osogna (supérieur) DC. Fait en intégrale à 2 en 9h avec marche d'approche. Très belle descente, on se fait bien arroser dans la 50m. Pas compris cette histoire de vasque piège. Même sans eau on peut en sortir facilement (de belle marche). (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/22493/observations.html)

We entered the canyon by helicopter shortly after the water intake. There are several obstructions in the superiore, but these can be easily negotiated. The rock was very slippery and the anchors were in good condition. (machine translated)
