<b>Gear:</b> Ropes: 2x40m		
<b>Summary:</b> (machine translated) Trou Blanc is also a scenic aqualand, but should not be underestimated with regard to the dangers associated with heavy water flow (especially backflow below the slides). The entry via the 50m rock wall offers a challenging vertical component, which is indicated when there is a lot of water flow.		
<b>Hydrology:</b>		
<b>Access:</b> (machine translated) From St-Andre on the D 48 via Salazie to Hell-Bourg (25 km). From here (950 m a.s.l.) Now on the D 48 to Ilet à Vidot and continue to the exit of the road. . Here park the vehicle (700 m a.s.l.).		
<b>Approach:</b> (machine translated) From the vehicle parked at the exit, go back 100m to the last junction and follow the signpost 'source petrifiante/Trou Blanc' on the "GR R 1 Variante" crossing the slopes high above the Riviere du Mat. Before reaching the houses of Trou Blanc, a cross at the side of the path offers 2 access options: Either descend to the right and then follow the path turning left to the entry at 'R1-bis' over a 50 m high vertical rock face with a transfer in the vertical (10/40 - hanging!). Or go straight up to the houses, there take the path branching off to the right down to the Rivier du Mat, where after about 300 m in the streambed you come to the rappel 'R1' Highest rappel in this case is 18m, as long as you stay in the streambed. The choice of access depends on whether the water flow allows an ascent of the attractive narrow section adjacent to R1. In case of doubt, the local guides advise the access via 'R1-bis' and usually walk it themselves.		
<b>Tour:</b> (machine translated) After the approach in the off. After an approach in the off. riverbed first an attractive narrow section, then follow slides and possible jumps, interrupted by some rappels. There are several bypasses, one of which involves a rappel of 35m.		
<b>Return:</b> (machine translated) Immediately before the suspension bridge, get off on the right and walk up the path leading from the suspension bridge on the right to the parked vehicle.		
<b>Coordinates:</b> Canyon Start <a href="#">-21.0630 55.4954</a> Canyon End <a href="#">-21.0559 55.5007</a> Parking Entry and Exit <a href="#">-21.0575 55.5014</a>		

## Reports:

2025-01-09 | Tobias Beiser | ★★☆☆☆ | 📖☆☆ | 📌★★★ | 🌊 Low | 🟢 Completed

The upper part was unfortunately destroyed by a rockfall. You now enter about 10m before the crossroads at the access (40m rappel just before the first emergency exit). The approach time in the description is not correct. Normal ascent time is 30-40 minutes. Tour itself top! Pools all very deep and almost all places can be repeated several times (ropes available for climbing up). Partly very slippery places (machine translated)

Automatisch importiert von Descente-Canyon.com für Canyon Trou Blanc Entrée par le R1 bis qui est équipé sur 2 lignes avec barreau deviateur Sentier d'accès depuis la piste environ 20 m avant une croix blanche L'éboulis dans l'entrée historique vu depuis le R1 bis est énorme avec persistance de blocs instables qui rendent impraticable cette section Reste du canyon ras (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2917/observations.html>)

2024-09-12 | System User | 📖 | 📌 | 🌊 Normal | 🟢 Completed

Automatisch importiert von Descente-Canyon.com für Canyon Trou Blanc Magnifique canyon malgré l'encaissement du début qui n'est plus praticable. Accès au R1 bis juste avant la croix sur la marche d'approche par une sente où il faut bifurquer à gauche très rapidement. Tous les sauts et tobs passent. Équipement parfait (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2917/observations.html>)
