Summary: (machine translated)
Short canyon with three striking waterfalls, fuses were removed in 2026.

Hydrology:

Access: (machine translated)
Leave the A10 at the Ossiacher See exit. Take the B94 to Sattendorf and follow the signs to the waterfalls.

Approach: (machine translated)
Follow the marked access to the waterfalls. The lowest waterfall is a good place to estimate the water level. At the spring, do not follow the hiking trail to the third (uppermost) waterfall, but follow the blue dots steeply upwards without a path in places.

Tour: (machine translated)
Caution: belays were removed in 2026.
Formerly three beautiful waterfalls, 35m, 21m and 24m, in between uninteresting block and walking terrain that is better avoided on the hiking trail. At the first two waterfalls, the anchor is orographic left, at the last fall orographic right. You can climb up to the accompanying hiking trail at any time. The chain anchors are very massive but unfortunately too far back: Watch out for the sharp edges on the upper two rappels. Pulling off the rope on the top rappel is very difficult.

Return: (machine translated)
Follow the hiking trail back to the parking lot.
