Summary: (machine translated)
Barranco de La Primera Boquera is located in Callosa De Segura, Alicante. We start the approach from the Ermita de La Pilaríca, through the ravine of Los Hoyos. Very entertaining ascent with continuous climbing steps to reach the flat in about 30 minutes approximately.
Once on the flat, we continue straight down and about 25 meters we will find a milestone that marks the head of the ravine. The first four rappels should be done with the rope in double, as the initial route is quite dirty and there is a risk of snagging.
In the fifth rappel and after walking about 15 meters, there is a life line to the meeting point. It will be a small vertical rappel of 10 meters.
In the sixth rappel we will find a life key anchored to the rock with a small maillon to descend the six meters.
In the seventh rappel we have a meeting with two parabolt and a clean descent to reach the star meeting.
In the eighth two turnbuckles, located on the ground, be careful with the eight, can be embedded and give problems to recover.
