Specialities:

Gear:

Summary: (machine translated)
Easy descent with rappels without too much flow. Best done in spring with abundant water.

Hydrology:

Access: (machine translated)
Access Gouaux and Juzet
We must reach Bagnères de Luchon from the French side by the D125 or from Spain by the Portillon from Bossost by the N141.
Location Gouaux and Juzet
From Bagnères de Luchon heading north on the D125, after about 5kms, we find on the right the detour to Gouaux on the D27a. We take it and soon we find a bridge, this is the exit of the ravine. We continue a little further and before a left curve we can park on the left side of the road.

Approach: (machine translated)
From where we have left the car, a little further back, there is a path that goes up the slope to 800m altitude, always climbing to the right in search of the river. There we will enter the river

Tour: (machine translated)
It is a very open descent, well installed, to practice. Aesthetically it is not the most beautiful but it has short access and returns and can be done in a short time.

Return: (machine translated)
We arrived at the road bridge
