Canyon length: 800m	**Highest rapell:** 22m	**Amount rapells:** 6
Transport:	**Rock type:**	**Drainage area:** km²
Season: January - December	**Orientation:**	**Best Time:**
Rating: ☆ 0 ()	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialities:

Gear:

Summary: (machine translated)
Simple and dry canyon with a first part with a lot of undergrowth but that gains strength until the rappel of Ullal del Vi. Very good views during the approach.
Regulation of the Parc Natural del Port:
http://parcsnaturals.gencat.cat/ca/ports/visiteu-nos/normes_i_consells/regulacio_dactivitats/#FW_bloc_5f7cccc7-e01b-11e3-b22a-000c29cdf219_8

Hydrology:

Access: (machine translated)
On the C12 from Amposta to Tortosa, we will turn off to Roquetes. Follow the signs to Alfara de Carles on the T342 and about 2.5 kms before arriving, at the sharp right turn there is a track on the left to El Toscar. Arriving at El Toscar we will park right in front of the old factory.

Approach: (machine translated)
Along the path that goes up to the Refugi de Clotes, Coll de Carabasses and the Cova dels Adells. After a kilometer we will leave the detour to the refuge and go to the right towards the cave. After 2 kms and a little we will arrive at the cave, the path continues upwards but here we will be next to the head of the cave, we will only have to go to the right in search of its access.

Tour: (machine translated)
A first part with a lot of undergrowth, the canyon will gradually close until we reach the Ullal de Vi where we have the highest rappel of 22m.

Return: (machine translated)
After the 22m rappel, we will soon find a path that will lead us without losing height to the access path.

Coordinates:
Canyon Start 40.8463 0.3541
