Altitude entry: m	**Altitude exit:** m	**Delta Altitude:**
Canyon length: 200m	**Highest rapell:** 35m	**Amount rapells:** 5
Transport:	**Rock type:**	**Drainage area:** km²
Season: March - November	**Orientation:**	**Best Time:**
Rating: ☆ 0 ()	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialities:

Gear:

Summary: (machine translated)
Short canyon, vertical and quite fattened. A little entertainment for a while.
The end of the canyon is in a private property, let's be careful not to anger the owners so we can all enjoy this descent.

Hydrology:

Access: (machine translated)
By the N260 to Sort, once there we turn off by the C13 to Llavorsi, we will pass it and head towards Esterri d'Aneu. We can also take the C28 from Vielha (Vall d'Aran). In both cases we will reach La Guingueta d'Àneu.
In La Guingueta we will look for the Poldo bridge to go up to Dorve and Berrós. Cross the bridge and continue along the road that takes us to the side of the reservoir, pass the area of Torrassa I and soon reach the Torrassa II, where we will park the car back.
With the access car we will return almost to the bridge to take the detour that goes up to Dorve, we will make the 4 sharp bends and after passing under the high voltage line, we will turn left and in an almost straight line we will have a nice meadow on the right, just before a Borda. We will park the access car.

Approach: (machine translated)
If we only have a car we will have to go up the road.
From the car we will go to the bed of the ravine, already very clear from here, leaving the cut more to the right.

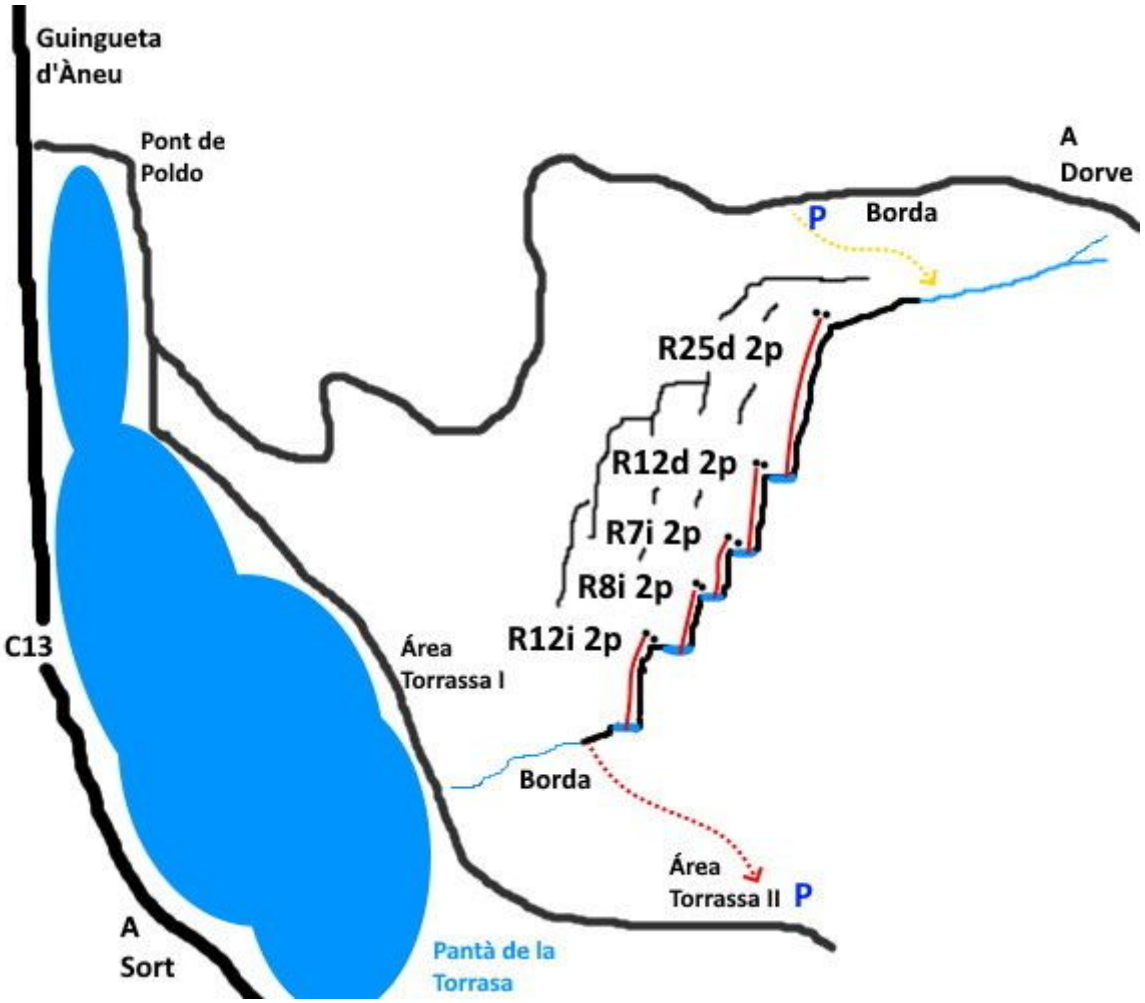

Tour: (machine translated)
A first rappel of 25 and the rest shorter to descend this wall so visible from the road.

Return: (machine translated)
When we reach the bottom we will see a path on the left that leads to the Torrassa II area. It is a private property!
