Ropes: ggf. Notseil

Summary: (machine translated)
Aquatic hiking and swim canyon in scenic wall, good for kids.

Hydrology:

Access: (machine translated)
On the N-240 from Lleida or on the A-138 from France through debn tunnel from Bielsa via Ainsa to Barbastro. On the ring road around the city and continue on the N-240 towards Huesca. About 22 km after Barbastro we turn right on the A-1229. Via Abiego and Bierge (turn left after Abiego) we arrive at Rodellar (about 30 km from the turnoff from the N-240). \If we have 2 cars available, one can be parked at the "Camping El Puente" at Alcanadre (about 600 m before Rodellar the tarred road steeply down to the left (signpost).

Approach: (machine translated)
In Rodellar, follow the signs to Barranco Mascun. We come down to the stream, cross it and come to the source on the right. Continuing northward, we now go up the Bco Fornocal de Andrebot on the left. We come out of the bushes and stand on an open plateau, right the haptic trail continues towards Nazarre and entry Gorgas Negras. We take the weaker tracks to the left, crossing the flat crest and hiking beyond down towards Alcanadre. You reach the river at the southeastern exit of a grassy plain with some poplars. Although the Barrasil begins a little further upstream, the descent usually starts here. To do this, you walk from the campsite "El Puente" at the Puente Pedruel along the trail in the direction of Rodellar. At the beginning it walks on the orographic left slope high above the riverbed of the Alcanadre, but then it descends at the old stone bridge "Puente Coda" to the Mascun. We cross the Punte Coda and follow the faint path that, after a few switchbacks to the high ground, later leads us continuously to the northwest. Finding the way may require some intuition and sense of direction. We then meet the approach path described above and follow it downhill to the left to the river.

Tour: (machine translated)
We start walking on the shore and crossing the river several times. We then come to a mess that is crossed most interesting in the run of the water line. However, if the water flow is (too) strong, you can keep to the right bank, if it is also problematic here, you can bypass the chaos right at the top of the slope.
Next highlight is "La Olleta" a deep and deep green jumping pool.
Do not pass inattentively on the left (happened to me on my first ascent).
At the exit come the long swim sections, where for a change but also always jump possibilities from the - mostly right - side are opened.

Return: (machine translated)
If we have a car at the campsite "El Puente" stand or have marched from there, we tend after the last long swim and the opening of the canyon right out and go path to the "Puente Pedruel at the campsite.
If we have only 1 car and it is at the top of Rodellar, we can also go to the campsite and from there on the tarred road to Rodellar (possibly car stop).
We can also walk from the campsite to Rodellar along the hiking trail already mentioned.
An interesting alternative is to swim into the narrow and easily overlooked mouth of the Mascun ("Ultimos Estrechos") before the exit of the last swim, then upstream in the Mascun and get off at the Punte Coda to the right onto the footpath to Rodellar, or to hike all the way up the Mascun and climb to the meadows below the rocks where Rodellar is located. From there, turn right up to Rodellar.

Coordinates:
Canyon Start 42.2850 -0.1091
Canyon End 42.2741 -0.0831
Alternative Canyon End 42.2705 -0.0809
Parking at Entry 42.2821 -0.0775
Parking at Exit 42.2709 -0.0801
