| Country: Schweiz / Switzerland    Region: Kanton Bern / Canton de Berne    Subregion: Verwaltungskreis Obersimmental-Saanen / Obersimmental-Saanen administrative district    Town: Lenk   |                             |                            |
| Difficulty: difficult  | Grading: v5 a2 V            | Total time: 8h15           |
| Approachtime: 2h30   | Tourtime: 5h                | Returntime: 45min          |
| Altitude entry: 2010m  | Altitude exit: 1500m        | Delta Altitude: 510m       |
| Canyon length: 800m  | Highest rapell: 60m         | Amount rapells: 32         |
| Transport: on Foot   | Rock type: limestone        | drainage area: 14.00km²    |
| Season: September - November   | Orientation: Northwest      | Best Time: 10-16 o clock   |
| Rating: ★ 4 (1)  | Info: ★ 2 (1)               | Belay: ★ 1 (1)             |
| Specialities:<br>Glacier in drainage area, Glacier lake,   |                             |                            |
| Gear:<br>Ropes: 2x70m  |                             |                            |
| Summary: (machine translated)<br>Tour in a deep limestone gulch, where there are also many boulders.<br><br><a href="https://gletschersee-lenk.ch/">https://gletschersee-lenk.ch/</a><br>Information on the condition of the lake.   |                             |                            |
| Hydrology: (machine translated)<br>Very difficult to estimate. There's a big glacier at the top, but a lot of it goes underground. What's important is that the glacial lake, which makes a tidal wave every year, is already empty!   |                             |                            |
| Access: (machine translated)<br>You can drive to the Simmenfälle restaurant by car. Then cycle to the Sibe Brünne.   |                             |                            |
| Approach: (machine translated)<br>Follow the hiking trail up to the Flueseeli, and then past the Flueseehöri, down the scree slope to the start of the Trüebbach gulch.  |                             |                            |
| Tour: (machine translated)<br>At the beginning, the cut is not so deep, but now and then there are beautiful zebra rocks, up there you can still get out of the water, but unsure whether you can get out of the wall. Towards the bottom, the gulch becomes more and more massive, and then there is only one way: down.<br><br>The tour is not recommended when the water level is high, as there are several vertical rappels that become extremely narrow over several meters. |                             |                            |
| Return: (machine translated)<br>First briefly over the scree, into the forest, and then follow the path back to the Sibe Brünne.   |                             |                            |
| Coordinates:<br>Canyon Start <a href="#">46.4060 7.4927</a><br>Canyon End <a href="#">46.4098 7.4837</a><br>Parking Entry and Exit <a href="#">46.4264 7.4765</a>  |                             |                            |
| Reports:<br><hr/> 2024-11-16   Bubtore   ★★★★★   📖★★★   ⚓★   🌊 Low   🍷 Completed<br>Walked on ice, at the top the ice was thick enough to stand on, later it wasn't, and in the end it was completely gone. Rating probably between 3.5 and 4 stars. Still very sparsely equipped with anchors. (machine translated)   |                             |                            |
