Summary: (machine translated)

Raw data import from Ropewiki <https://ropewiki.com/Rovine>

Hydrology: (machine translated)

July to October. Relatively watery, do not undertake in strong current. Presence of a siphon after a C12.

Access: (machine translated)

From Domodossola, cross the Toce and reach Croppo. From there, continue in a southerly direction to Beura. To the south, leave the SS33 at Villadossola.

In the center of the village there is a bridge over the stream.

Park before or after the bridge.

Approach: (machine translated)

On the RD: ascent to Bissoggio. At the highest point of the village, turn right towards Alpe Solia. Cross the Rovine tributary and continue to Alpe Solia di Fuori (alt. 753m). Continue slightly uphill for another 450 m to Alpe Solia di Dentro (alt. 795 m). Shortly after a fountain, descend to the right and after the 3rd house at a stone slab, descend steeply into the forest on a very inconspicuous path. The Raduno topographic view 2018 indicates that the descent can be made through an old canal if in doubt... 15 to 20 minutes descent.

Approach RG: With the 4.4 km shuttle bus: From the bridge, follow the small road south, climb up to Cardezza, pass the hamlet and turn left towards Marzone. Follow the road until you reach a hiking sign below a magnificent chalet (Marzone: 50 min, 2 places). Or you can drive a little further and park near the prohibition sign (parking lot 200 m after the sign)... The path is therefore forbidden, but a quick drop-off should be "possible"... From Marzone you reach the highest house, via a small road you reach the helicopter drop zone. From there, follow the path that always runs horizontally and always turn left. After the first junction, the path is unmarked but obvious.

Tour: (machine translated)

Long and challenging route aimed at trained teams.

Return: (machine translated)

Exit RG (water inlet + path), RD or through the streambed...

Coordinates:

Canyon Start [46.0786 8.2986](#)
