<b>Summary:</b> (machine translated) Very beautiful rappel canyon; many slippery spots; the highest abseils come at the end; most of the sun is in the canyon from midday; well equipped. Pissanda was equipped with SOS badges in January 2023 (21 marked abseiling points), some sharp edges; most of the abseiling points are in the watercourse, so it is essential to check the water level; catchment area approx. 7km².		
<b>Hydrology:</b>		
<b>Access:</b> (machine translated) From the village of Amaro ri. Venzone --> turn left into the village of Portis and then past the last house --> drive up the road to the exit --> here you have a small parking lot (from the parking lot you can already see the last rappel and the water level) --> approx. 260Hm.		
<b>Approach:</b> (machine translated) From the parking lot, cross the stream and walk up the steep hiking trail to the right --> after approx. 15 min. a second hiking trail joins --> keep to the left and walk up the path over several concrete safety barriers. At 540m you come to the stream where a path on the left leads directly to a small water catchment in Pissanda.		
<b>Tour:</b> (machine translated) Walk along the slippery streambed and overcome several climbing passages to the 1st small slide approx. 4m --> slippery passage with rappel on the left (traverse rope possible) --> after a short walking passages another short rappel --> then walk over blocked terrain --> rappel point (approx. 27m) --> followed by 3 more short rappels --> possibility 1. Emergency exit (left) --> rappel and slide passages --> 2nd emergency exit (left) --> rappel approx. 15m --> small slide --> rappel approx. 10m --> after checking the water depth another small slide --> 3rd emergency exit (left) --> now follow the highest rappel points with 13m, 40m, 25m and 35m (the safest way to the last stand (rappel) is with a rope traverse, bolts available).		
<b>Return:</b> (machine translated) After the last rappel and a short walking passages you leave the streambed on the right side--> in a short time you are at the parking lot (260Hm).

Something is dead in the midway, you can find remnants under the ladder. You don't feel like getting into water afterwards. Anchor no. 1 got a shot but still OK.

Have rarely walked such a slippery canyon. You have to be very careful not to slip. There were two of us in the canyon and it took us 2 hours. Access 30min. All stands in order. (machine translated)

2025-04-05 | Péter Bonczi | ★★☆☆ | 📖 ★★ | 🚧 ★★ | 🌊 Normal | 🟢 Completed

Unfortunately in very slippery condition. Fitting OK. (machine translated)

Everything ok, bit slippery, nice continues canyon with out alot of walking, would get more stars if the water wasn't so dirty and slippery

All stalls ok, although many are single stalls. (machine translated)

Unfortunately again much more slippery than on various ascents last year. Stands ok so far; the tree in the narrow section caused problems this time when pulling off; it is recommended to use the anchor on the right at the exit for the last 3 m (then you can theoretically climb up again and release the rope from the tree). 2023-11-27 | Wolfgang | ★★☆☆ | 📖 🚧 | 🌊 Normal | 🟢 Completed

Made the most of the midday and NM sunshine and whizzed through the Pissanda. Thanks to the heavy October rain, it's practically not slippery at the moment. There is now a large tree in the middle of the gorge at the narrow section which could possibly cause problems when pulling off the rope; otherwise everything is OK (machine translated)

2023-09-24 | Clarissa Linder | ★★☆☆ | 📖 🚧 ★★ | 🌊 High | 🟢 Completed

High water level after rainfall makes the canyon even more interesting. No sun in the canyon in the morning. (machine translated)

2023-06-03 | Horst Lambauer | ★★☆☆ | 📖 ★★ | 🚧 ★★ | 🌊 Low | 🟢 Completed

Description I have adapted to the current conditions. Approach was previously described outdated and the number of rappels was also incorrect. Water level is currently low stands are all tiptop (machine translated)
