Summary: (machine translated)

Grippy limestone; short open canyon; multiple exits; no high rappels; small catchment area approx. (4Km²); clean water.

Hydrology:

Access: (machine translated)

Coming from Villach drive into the Drau valley until Fellbach --> shortly before the end of the village a forest road on the left goes up into the forest --> here it goes to the village above --> after a group of houses the road forks --> continue on the left until you reach the bridge --> park on the right side (few parking spaces).

Approach: (machine translated)

Pass the bridge on the right (hiking trail) --> you will pass a water level measuring station (inlet in the lower part of the canyon) --> continue up the trail until you reach the forest road --> then follow the forest road up to 980Hm (bridge over stream) --> from the forest road you have several opportunities to look into the canyon.

Tour: (machine translated)

After a short walking passages and small slides follow several small steps which can be partly rappelled outside of the water flow --> arrived at the weir you have an approx. 10m rappel point in a deep pool --> after the weir there are a few small mostly unproblematic rappel steps (slides) --> the canyon, which is suitable for beginners, is very open and at higher water levels still well doable --> in addition there is the possibility to get off almost in the entire canyon course on the forest road.

Return: (machine translated)

After the last step and a short walking passages in the stream, you reach the forest road on the right and return to the parking lot in a short time.
