Gear:
Ropes: 2x40 m

Summary:
The Râmnuța Canyon, a left tributary of the Cerna River, is probably one of the most aquatic and technical canyons in Romania. Located in the Mehedinți Mountains, it is the result of waters that have shaped the entire route of the Râmnuța Gorge.

Hydrology:

Access:
Good gravel road, suitable for normal cars

Approach:
Very steep walk-in scramble, look for the yellow dots and the cable handline.

Tour:

Return:

Coordinates:
Parking Entry and Exit 45.0749 22.6203
Canyon Start 45.0736 22.6237
Canyon End 45.0746 22.6218

The access is not simply 'very steep', it is sheer horror. In fact a II-III grade exposed rock climbing with some sections of via ferrata on loose land. There is no real path, just a trace, very difficult to find (yellow dots hardly help, they are present at the very beginning and the very end only). You basically have to climb the wall as soon as possible. Now the water was very low, so the canyon itself was technically peaceful, but I can imagine that it is rather different in the spring.

Very steep walk-in scramble, took us a while to find it. Very slippery canyon but pleasant, sustained. Best in the immediate area.
