Specialities:

Gear:
Ropes: 1x 30m

Summary: (machine translated)
Beautiful great canyon in red slate for swimming and hiking.
You can also start hiking at the beginning of the gorge. In this case, however, the time required is more than double (see link).

Hydrology:

Access: (machine translated)
From Nice through the Var valley to the north, then west and finally north again to the Gorge de Daluis (via the D 2202 towards Guillaumes). After the village of Daluis, the road climbs steeply. A few hundred meters before the bridge over the Bertheou, there is a rest area on the right - Aire de Roua - where we park our car for the exit.
We then take a spectacular road along the canyon to a parking lot opposite the Clue d'Amen waterfalls (3km implementation). Park here.

Approach: (machine translated)
A marked path leads directly from the parking lot down to the canyon

Tour: (machine translated)
Follow the course of the river until you reach the exit of the canyon after approx. 2.5 km.
According to the local information, despite the fact that there are no rappels, 1x 30m of rope should be carried.
It is also possible to combine the short version of the Clue d'Amen with this river walk.

Return: (machine translated)
At the exit of the canyon, after the Bertheou Canyon joins from the right, a path marked with cairns leads back to the first parking lot.

Coordinates:
Canyon Start 44.0542 6.8482
Parking at Exit 44.0389 6.8326
Parking at Entry 44.0549 6.8454
Canyon End 44.0369 6.8360

Automatisch importiert von Descente-Canyon.com für Canyon Daluis Chantier de dépollution aujourd'hui avec chasseurs, LPO et réserve naturelle. Ne pas toucher aux tas de ferrailles vers la fin du parcours mais possibilité d'en ajouter un peu si vous en voyez, il en reste encore pas mal (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/21429/observations.html)

Automatisch importiert von Descente-Canyon.com für Canyon Daluis Encore gros pour l'aquarando avec des enfants mais bien rigolo pour des adultes. Par contre en kayak c'est quasiment la fin (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/21429/observations.html)

Automatisch importiert von Descente-Canyon.com für Canyon Daluis Du pont des roberts à Amen ça passe bien malgré quelques passages sportifs. Dans la seconde partie, le passage de l'éboulement demande un peu de vigilance et nécessite de la nage en eau vive pour être franchi. C'est rigolo de se retrouver au milieu des kayaks à nager. Stage eau vive donné pour la FFCAM Nice (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/21429/observations.html)

Automatisch importiert von Descente-Canyon.com für Canyon Daluis Fait en 1h30 en partant des cascades finales d'Amen, on a réussi à faire pas mal de floating malgré le niveau d'eau assez bas (40cm d'eau sur une grosse partie du parcours). C'était magnifique mais ça doit être pas mal avec plus d'eau. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/21429/observations.html)
