Summary: (machine translated)
Varied descent in wild scenery

Hydrology:

Access: (machine translated)
On the Corte - Ponte Leccia link road, about halfway, is Francardo. From here, take the D 84 in the direction of Calacuccia, entering the Golo canyon Scala di Santa Regina. 7 km after passing the Ponte Castirla, you come to the bridge over the Falconaia and have a view of the high waterfall (if water flows). 600m further we come to the bridge over the Ruda. Park the lower car here, unless parking is prohibited in the Golo canyon at this time (see above under "Notes").\nWith the second car continue for 2.3 km on the D84 and then turn right up to the village of Corsica. Park at the church.

Approach: (machine translated)
From the parking lot, go up to Corscia, where a path leads eastwards towards the power line; pass the first junction to the left and later walk a few hundred meters parallel to the power line up to the height (898 m above sea level). On the other side, descending through the forest, you come to the old Ponte Sutanu (Sottano) arched bridge over the Ruda, where the entry point is.

Tour: (machine translated)
Versatile descent in attractive surroundings, some jumps and slides possible. Also suitable for beginners.

Return: (machine translated)
It is at the old Genoese double arch bridge. You then follow the historic mule track 'Scala di Santa Regina' over this bridge in an easterly direction and reach the starting point at the car at the top of Corsica in about 1½ hours on this scenic path. It would also be possible for only the driver to pick up the car, but for the others to descend with their luggage to the D84 and be picked up there.

Coordinates:
Canyon Start 42.3675 9.0542
Canyon End 42.3660 9.0684
Alternative Canyon End 42.3653 9.0661
Parking at Entry 42.3558 9.0428
Parking at Exit 42.3661 9.0686
