Summary: (machine translated)

Rappel canyon, usually dry.

Hydrology:

Access: (machine translated)

On the GC_1 from Maspalomas to Arguineguin. After leaving the GC_1 there and driving towards the center of Arguineguin, change at the next exit to the east side of the valley and drive northwards on the GC_505 in the valley of the Barranco Arguineguin. After about 8 km on the GC_505 you reach the town sign of El Horno. Right here we turn left and park our vehicle 200 m further on (150 m above sea level).

Approach: (machine translated)

We climb the ridge on the orographic right side of the Bco. pathless (up to about 360 m a.s.l.). Then we cross under the rock bar about 150 m to the left (in southern direction) and look for a suitable ascent possibility to overcome the rock bar. At the top, we go north again until we reach the bed of the barranco.

Tour: (machine translated)

9 vertical and mostly quite airy rappel.

Return: (machine translated)

After the last rappel (8 m) about 150 m out to the right to the car.
