Transport:	**Rock type:**	**Drainage area:** km²
Season: June - August	**Orientation:**	**Best Time:**
Rating: ☆ 0 ()	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialities:

Gear:

Summary: (machine translated)
In beech forest, surrounded by lush vegetation is this unknown descent. Poor facilities but worth it

Hydrology:

Access: (machine translated)
We have two possibilities and for both we have to go to Lescun. By the N134 after passing the Somport pass or from Pau.
We go up the road to Lescun D239 and just before arriving, in a sharp right turn we go straight ahead (the sign says Labrener col de Pau).
We will continue along this road until we cross the D340 where we will go straight ahead (the sign says Labrener col de Pau). From here we continue straight on until the road ends, it becomes a track and soon we park before the bridge.

Approach: (machine translated)
We will go along the track up the river for almost an hour until we see a small bridge where we will access the river.

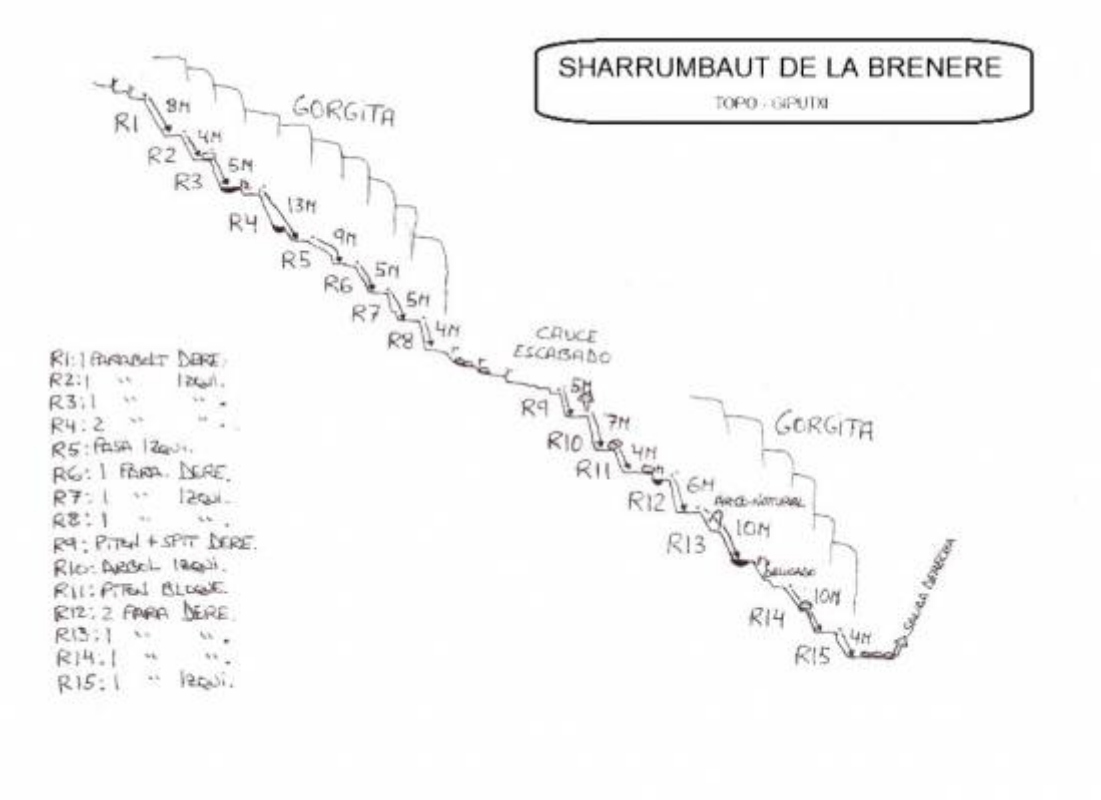

Tour: (machine translated)
Descent full of short abseils and abseilings in an environment full of vegetation.

Return: (machine translated)
After the last rappel, we turn right and take the access track to the right.
