Country: España / Spain **Region:** Cataluña / Catalunya **Subregion:** provincia de Gerona / Provincia de Girona
Town:

Difficulty: not as difficult	**Grading:** v3 a2 II	**Total time:** 2h30
Approachtime: 10min	**Tourtime:** 2h	**Returntime:** 20min
Altitude entry: m	**Altitude exit:** m	**Delta Altitude:**
Canyon length: 1100m	**Highest rapell:** 21m	**Amount rapells:** 13
Transport:	**Rock type:**	**Drainage area:** km²
Season: September - May	**Orientation:**	**Best Time:**
Rating: ☆ 0 ()	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialities:

Gear:

Summary: (machine translated)
Gully with some water in rainy periods and always in dry summer, generally open and quite dressed, which forces us to make combination of cars. It was equipped by members of EGAN so the best way to find more accurate information is to contact them.

Hydrology:

Access: (machine translated)
From Ripoll to Sant Joan de les Abadesses on the N260, at pk 111.5 past the restaurant Rama, we have two left-right bends over the stream and a track on the left that climbs to the Serra de Sant Amand.
We will go up this track for more than 6kms until we pass the detour of "el Negre" and reach the GR3 signpost (around the coll de Fullosa). We park the return car.
With the other car we will go up to the Coll de la Tuta, here we find another signpost with the path to Vidabona.

Approach: (machine translated)
Along the aforementioned path we will walk towards the Cal Pegot plains and after 10 - 15 minutes we will find the torrent to descend.

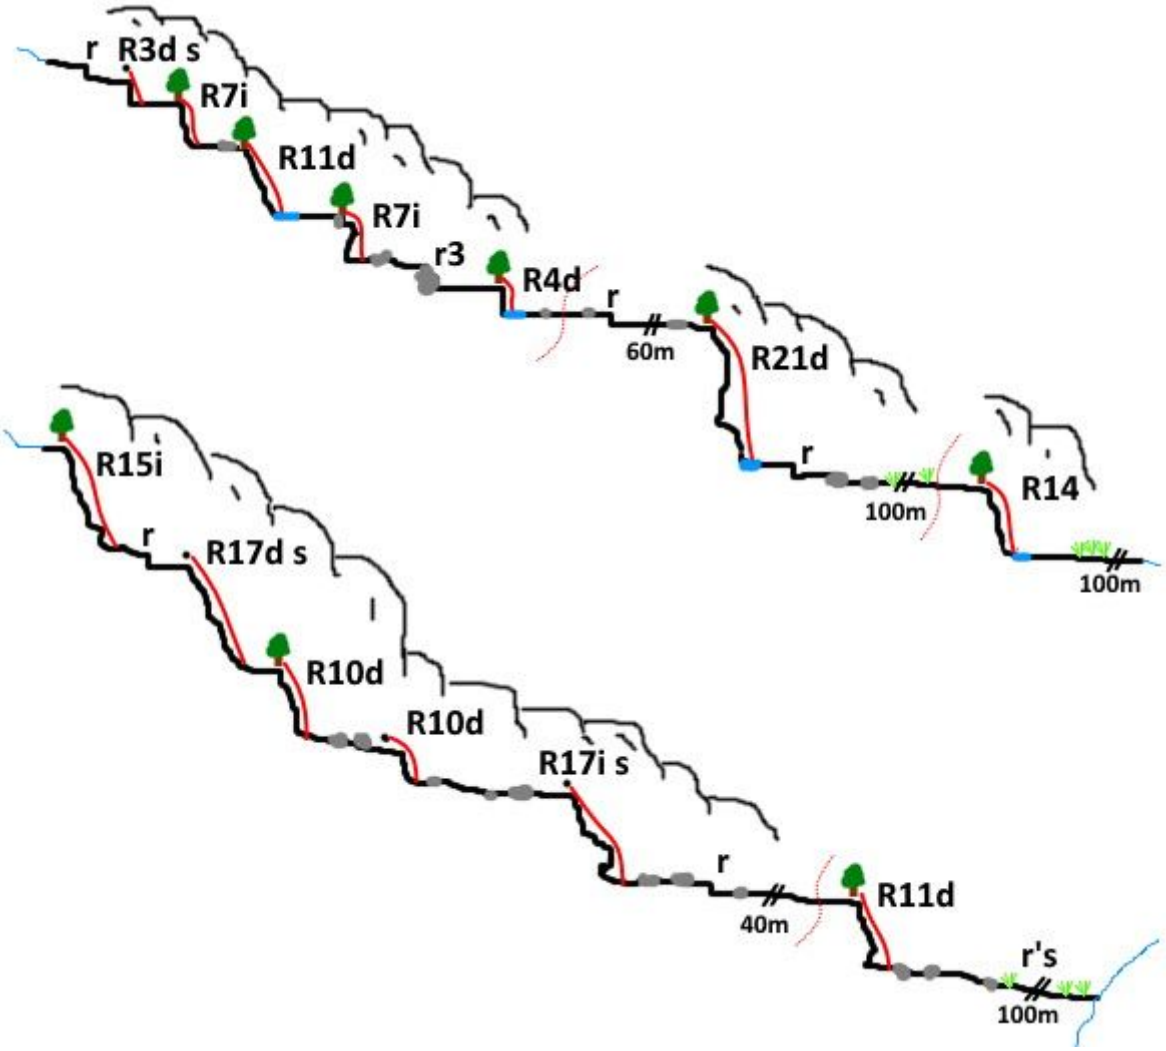

Tour:

Return: (machine translated)
After meeting the Sant Amand stream, we will continue 100m, take two more rappels and we will find the GR3.
We take it to the left, ascending to the track where we have parked.
