Summary: (machine translated)
dry forest canyon for collectors

Hydrology:

Access: (machine translated)
From Fano on the Adriatic Sea almost 50 km to Cagli. Here turn onto the 424 towards Pergola. 2.5 km later turn right and go through Acquaviva and Colombara to Frontone. Continuing in the direction of Serra S. Abbóndio, after about 1.5 km you reach Petrara and shortly after a bridge. Immediately after the bridge turn right. In the background you can already see the rock walls of Val Grande. Follow the tarred road almost to the exit and park in the large square near the fountain in the hamlet.

Approach: (machine translated)
The tarred road mutates into a dirt road. After a few meters we turn right (photo) and after about 40 min. we come up to a ridge. There, a path moves a little below (east of) the ridge in direction SSE and reaches the height above the canyons (another 25 min.). Cross the first green cirque on the left, reach the next shoulder and descend comfortably to the stream on the left.
