Summary: (machine translated)
Very long tour in a narrow gorge with high waterfalls. Unfortunately mostly dry.
Intermediate entry or exit at the road bridge to Nocelle.

Hydrology:

Access: (machine translated)
Paid parking lot in Nocelle

Approach: (machine translated)
After parking near the village of Nocelle, take the steep CAI path no. 31 that leads up to Monte Caliello,
and then continue on path no. 33, which passes a recent landslide and crosses into the valley of our tour. Entry at the crossing of the mostly dry streambed.

Tour: (machine translated)
The canyon immediately begins with dry rappels of between 15 and 45 meters until the high 75m waterfall is reached, where
there is a steel cableway that carries wood to the Nocelle bridge. Exit of the first, dry part.
Water sometimes appears under the waterfall, unfortunately also garbage at the Nocelle bridge. Fortunately, the garbage soon disappears, the canyon narrows between narrow and very high walls that offer nice rappel until we reach the entrance to Vallone Porto, a beautiful waterfall of 100m that offers an intermediate belay after 65m.
The canyon continues in a more open environment to the bottom of the valley, where a hermit lives in a beautiful erimitage.

Return: (machine translated)
From the beach, either walk back to Nocelle (min. 1h) or take the bus back. Parking spaces are scarce in high season.
