Summary:
Dzmuisi Canyon is located in the Imereti region, near the village of Dzmuisi, in the Lekhidari River valley, approximately 40 km from the city of Kutaisi. Some sections of the road to the canyon require a 4x4 vehicle.

From the parking area, there is a one-hour hike through the forest to reach the starting point.

The canyon features 12 waterfalls, some with deep pools and strong currents. The highest waterfall is 18 meters.

The second half of the canyon is narrower and has no emergency exit points.

There are 8 abseiling points equipped with handrails, 3 natural toboggans, and 1 jump (4 meters high).

ATTENTION* The coordinates given are most likely incorrect! Despite a poor description of the approach, we started at approx. 1020m and downclimbed to 920m. Entry was not at the indicated 950m. Maybe the entry is deeper or the neighboring canyon is the actual canyon? (machine translated)
