Gear:
Ropes: 2x 40m

Summary: (machine translated)
Short canyon, quickly accessible after rain.

Hydrology: (machine translated)
The amount of water can be assessed at the bridge over the "Ri della Terra di Fuori".

Access: (machine translated)
Into the Maggia Valley until a car bridge between Ronchini and Maggia leads to the orographic right-hand side of the Maggia in the village of Moghegno.
On this side of the Maggia, return via the "Ri di Dentro" to Aurigeno as far back as the bridge over the "Ri della Terra di Fuori".
Park at this bridge and assess the water level.

Approach: (machine translated)
From the parking lot, cross the bridge over the "Ri della Terra di Fuori" to the orographic right side of the stream.
Take the first hiking trail on the right towards "Ronco dell'Orto" or Chiazza.
Pass the second bridge on the left (from the ascent point of view) and continue uphill.
At the next junction, keep right towards "Chiazza" and cross the water again.
In Chiazza, turn left/uphill.
Now either take the large hairpin bend over "Valecc" or the hairpin bends directly to the small chapel on the ridge.
From the small chapel, without gaining any height, follow the tracks of a path through the undergrowth to the stream.

Tour: (machine translated)
At the beginning beautiful abseiling point(s) followed by a varied river walk with beautiful individual sections.

Return: (machine translated)
From the bridge over the road back to the parking lot

The exposed path to the entry is very thorny. The stands are all OK. OK as an alternative if there is too much water. The rappels to the mouth of the Terra dei Fiori and the T7 are the highlights, with an S2 at the exit. (machine translated)

We got in at the same entry height in Terra di Fuori, which turned out to be a slippery forest canyon. 2 rappels on trees and a lot of downclimbing. At the confluence, the route described here is quite nice with a slide and jump at the exit. Anchor from the confluence in order. Slide and jump were possible. (machine translated)
