Canyon length: 300m	**Highest rapell:** 20m	**Amount rapells:** 15
Transport:	**Rock type:**	**Drainage area:** km²
Season: March - November	**Orientation:**	**Best Time:**
Rating: ☆ 2.6 (2)	**Info:** ★ 0 ()	**Belay:** ★ 2 (1)

Specialities:

Gear:

Summary: (machine translated)
Nice ravine near Bitet, Canceigt, ... dwarfed by these giants, it is a simple and accessible ravine except in the thawing season. Little boxed but very continuous and always between a dense and lush vegetation. If the gullies are strong, Gourzy will surely be perfect.
Attention: be careful when crossing the Gave d'Ossau, confirm that it is possible to cross before entering.

Hydrology:

Access: (machine translated)
Location Eaux Chaudes
We must go to the French town of Laruns.
To do this we cross the Portalet and follow the D934 towards Eaux Chaudes.
From Pau by the N134 towards Laruns and then by the D934 towards Eaux Chaudes.
Location of the Gourzy and Leignieres ravines
From Eaux Chaudes towards Portalet, at the turn-off to Goust we will leave the car to return.
From the detour to Eaux Chaudes the road crosses the bridge over the Ossau and soon a paved road on the right, we take it and go up to the bridge over the stream.

Approach: (machine translated)
Access to Gourzy and Leignieres canyons
Directly from the bridge we can rappel from here or go up and climb.

Tour: (machine translated)
Descent between trees in a wooded environment. Except for a slightly narrower area, the rest of the ravine is not dangerous.

Return: (machine translated)
Arriving at the Gave d'Ossau, we go upstream a little, cross the river and climb "as best we can" to the road.
Never try to go down the Ossau, which flows downstream!

Coordinates:
Canyon Start 42.9450 -0.4393

Automatisch importiert von Descente-Canyon.com für Canyon Gourzy Il serait judicieux d’équiper un relais au 1er ressaut, l’amarrage en corde sur l’arbre RG récemment posé étant mal positionné et l’accès de pire en pire. Canyon de plus en plus fréquenté. Les 2 derniers relais en corde sur plaquettes à surveiller.Retour : arrivé au gave le descendre sur 30m un sentier part sous les arbres en RG (présence d’un cairn).
