Specialities:

Gear:

Summary: (machine translated)
O del río Cabanas is a canyon with a lot of slope but without spectacular rappels, they are all ramps and the environment is not really well modeled. Better after rains to ensure a good flow.

Hydrology:

Access: (machine translated)
Getting to A Pobra de Tribes
We will take the CV65 to Montefurado for 9 kms until the hydroelectric power station of Pontenovo, where we turn left and go up to Navea.

Approach: (machine translated)
We leave Navea continuing along the road and after 100m we have a path on the right, it climbs above Navea (it takes us backwards) to take another path further up that goes west and leaves us at the head of the ravine.

Tour: (machine translated)
Two parts, the first part better configured up to the road, the second part less aesthetic, much better if we descend it with good flow.

Return: (machine translated)
After the last climb, we will be attentive to the path that leaves to our left and takes us directly to the village.
