Specialities:

Gear:

Summary: (machine translated)
Two sections, the first one is open and full of ledges, cliffs and waterfalls, and the second one, more excavated, concentrates most of the difficulties, cliffs, waterfalls, highlighting the longest rappel, with optional handrail. The descent is relatively short, although the abundant flow practically all year round makes it interesting. It is an interesting and beautiful descent in a typical Pyrenean environment and landscape.
As it is a short descent, there is the option of continuing up the access road to the upper Literola ravine and descending the two sections, lengthening the day a little more.

Hydrology:

Access: (machine translated)
Arriving in Benasque, we continue north towards Baños and Hospital de Benasque. At the height of the Baños de Benasque there is a bridge with the sign Barranco de Literola. We park in the esplanade before or after the bridge.

Approach: (machine translated)
Walk 20m along the road and to the left is a marked path. We go up this path until the forest ends and the meadows begin, soon we will see the access to the ravine on the left.

Tour: (machine translated)
Alpine descent, with good atmosphere, lots of water and quite open in the first part. The second part is more closed.
The rappels are very well equipped, all of them with installation outside the active, this does not imply that we relax. On the last rappel you have to be careful with the embedded block at the reception.

Return: (machine translated)
Destrepes to the bridge and trail with milestones on the right that leads up to the road.

Automatisch importiert von Descente-Canyon.com für Canyon Literola inférieur Un rappel intéressant (dans l'actif), le reste est sans intérêt.... Peut être avec beaucoup plus d'eau? Ne serait-ce pas la bouse de Benasque?? (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/22119/observations.html)
