Country: Österreich / Austria **Region:** Oberösterreich **Subregion:** Bezirk Gmunden **Town:** Gosau

Difficulty: a little difficult

Grading: v4 a3 III

Total time: 5h5

Approachtime: 1h

Tourtime: 4h

Returntime: 5min

Altitude entry: 1040mm

Altitude exit: 740mm

Delta Altitude: 300m

Canyon length: 400m

Highest rapell: 30m

Amount rapells: 30

Transport: on Foot

Rock type: limestone

Intake area:

Season:

Orientation: South

Best Time:

Rating: ★★☆☆☆ 2.6 (2)

Info: 📖📖📖 0 ()

Belay: 🧱🧱🧱 0 ()

Specialities:

suitable in rainy weather,

Gear:

Ropes: 2x40

Bolting set,

Summary: (machine translated)

Slippery forest canyon with some nice single passages (pay attention to water level/inflow); level controllable at rappel 9; approx. 30 rappel points; dragon's mouth (cascade) with little light incidence; the more rewarding or interesting part starts after the forest road.

Hydrology:

Access: (machine translated)

From Abtenau take the B166 (Pass Gschütt Str.) towards Gossau --> at the T-junction in Gossau turn left (towards Bad Goisern) and follow the Romantikstr. --> approx. 2 km after the end of the village there is a small bridge (Bärnbach) --> park here on the right at Holzhandel-Transporte Kressl (or better opposite at the car park/wood storage area).

Approach: (machine translated)

From the parking lot to the left along the hunter's path next to the stream -- initially still flat and clear, the path in the forest becomes steeper and more difficult --> after about 40min. (200Hm) comes a forest road (long material cable car) --> Either follow the forest road to the creek and go only the (more interesting) lower part or follow left the narrow path further through the forest to get to the upper entry --> for the upper entry (at about 1040m) leave the path at a suitable place on the right and descend into the creek.

Tour: (machine translated)

Arrived in the Bärnbach follow after a short walking and climbing passage the first rappel points --> the highest and at the same time most beautiful rappel points in the canyon occur at the beginning and in the lower part of the canyon --> the entire canyon is very slippery and the rappel are mostly in the Wasserführung --> several entangled trees have to be downclimbed -. -> at the belaystation there is mostly only one bolthook with a short chain (in good condition during our ascent) --> on the so called "dragon's mouth" (dark cascade) is in the cut lower canyon section --> in the middle of the abseil there is a deep hollow which can be bypassed with some skill --> in the canyon there are many abseils, In the canyon there are many abseils, several narrow passages and with the right light a beautiful play of colors due to the contrasting surroundings --> towards the exit the canyon opens up and you hike along the streambed to the dam wall.

Return: (machine translated)

Once at the dam, follow the trail on the right back to the parking lot.
