Approach: (machine translated) Either from the parking exit on foot to the entry according to <a href="https://de.wikiloc.com/routen-wandern/rotenbach-140992616">https://de.wikiloc.com/routen-wandern/rotenbach-140992616</a> or from the Brünneliseggalpe (Weiler Schnellvorsäß) first follow the dirt road for 50m, then turn left towards the west onto a path that leads in the direction of Vorsäß Klausberg in a wide right turn to the stream (entry)		
Tour: (machine translated) See photos and video of the ascent on 15.07.2023. After the 6th or 7th rappel (the rappels are numbered consecutively), a lateral rockfall fell into the canyon. This destroyed 2 of the old anchors. We helped ourselves with rappels from dead wood. The situation here is still somewhat unstable.		
Return: (machine translated) As soon as possible after the last rappel turn right and follow a clear track through the sparse forest down the right bank of the stream, later left along the edge of a meadow down to the road and your car.

Reports:		
2023-07-15   Wolfgang Streicher   ★★★   📖★★★   ⚓★   🌊 Normal   👍 Completed Widely unknown gorge. The stands are mostly equipped with only 1 attachment. The numbering suggests an intermittent commercial access. After the 6th or 7th rappel (the rappels are numbered), a lateral rockfall has fallen into the gorge. This destroyed 1-2 of the old rappel points. We helped ourselves with rappels from deadwood. The situation here still seems a bit unstable. (machine translated)
