Hydrology:

Access: (machine translated)
From Oloron-Sainte-Marie, take the D-919, then the D-918 towards Tardets(-Sorholus). 1 km before reaching the village of Tardets, we join the D-26 and follow it for 8.3 km in a southerly direction (Larrau, St. Engrace). Then turn left onto the D-113 and continue for 5.5 km to La Caserne with the Mairie (mayor's office) de Saite-Engrace. Immediately after La Caserne, turn half right off the D-113 and cross the river (Gave de Sainte-Engrace) 450 m further on. At the fork 70 m further on, stay right and continue up the canyon rim. In a hairpin bend to the left, we park our (possibly lower) car (400 m after the last fork).
With a second car, we continue uphill in a wide right-hand bend until we reach the upper parking lot in a leftward haipin bend (3.2 km from the lower parking lot) cf.: http://4.bp.blogspot.com/-HVFWE5znEu4/UlwbPaGi53I/AAAAAAAAMTI/G16gY9o1Ia8/s1600/Plano+Ourdaibi.bmp

Approach: (machine translated)
From here we follow the footprints that lead in a slight right turn down into the streambed.

Tour: (machine translated)
In the smooth washed limestone and clear water it goes downhill. Tree entanglement must be expected. Already in 1999 firmly installed handrails. Longer runs. Caution at the 28 m waterfall: hole in the chute under the water jet !

Return: (machine translated)
After a 5 m rappel and about 250 m of walking, we see a metal ladder on the righthand side, over which we climb the right slope. Then it is only a few meters to the car.

Automatisch importiert von Descente-Canyon.com für Canyon Ourdaybi Assez glissant, typique des canyons basques. SURTOUT le départ de la C25, ça peut surprendre ! Équipements en bon état mis à part un départ de main courante rive gauche après la C25 un peu rouillé. (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/2968/observations.html)
