Summary: (machine translated)
As an introduction, I recommend reading this description first: https://www.opencanyon.org/de/canyon/7f138f2b-235c-4f9c-8fac-21f5c68f58af
The following is a short watery rappel and swim canyon, which is part of the great canyon Garganta de Escuain, but which is bypassed on the (orographic) left high bank when climbing Escuain med.

Hydrology: (machine translated)
Level: http://www.saihebro.com/saihebro/index.php?url=/datos/ficha/estacion:A051

Access: (machine translated)
We head north on the A-138 from Ainsa towards Bielsa. We pass through Labuerda and Escalona to reach the bridge over the Rio Yaga, where the Miraval canyon ends - 17 km from Ainsa, town center. We pass the hamlet of Hospital and 450 m after the bridge over the Rio Yaga we turn left uphill at an acute angle towards Tella, Revilla. We drive steadily uphill, leaving the turnoff to Tella on the right after 5.7 km. We continue towards Revilla and after another 4.9 km we come to a sharp right turn, at the left edge of which there is a large open space where we can park our car. From here it would be another 0.9 km to Revilla.

Approach: (machine translated)
From the parking lot, a path with great views, especially at the start, leads down towards Escuain and Garganta de Escuain. We cross a stream (including a beautiful waterfall for rappel), cross the Consusa at its exit below an equally beautiful waterfall and then look out for a fork where the path leads down to the left into the Escuain streambed and up to the houses of Escuain on the other side. However, we turn right here and walk northwards high above the riverbed of the Rio Yaga. Now we are already in our canyon. The path is repeatedly interrupted by small climbs (not difficult). Then we come to the exit of the parts where the first part of "our" rappel canyon ends. In the access we bypass this part on the north-eastern slope in the coppice. We return to the river bed and turn left downstream. We follow the beautifully shaped channel and throw on our wetsuits where the Bco. Lugar comes down from the right. Here we have already crossed the border of the NP to the outside.
Access is also possible from the opposite side of the slope from the hamlet of Escuain. In this case, access can be made directly to the entry point via an ascent of the Bco. Lugar.

Tour: (machine translated)
First 3 rappels, each with possible jumps as an alternative. Then follows the running route, which we have already hiked up during access. A few meters after the wall in the riverbed, which has been destroyed by the water, we come to the waterfall with the unique pool below. There are several ways to rappel here, but the highlight is a jump from a ledge on the left from a height of around 13 meters. After "landing" in the large pool, you can repeat the jump if you feel like it. To do this, walk about 100 m downstream and then follow the well-trodden tracks on the left up to the path.
You can also go further downstream in the Rio Yaga and then even add the Bco, Miraval (own description).

Return: (machine translated)
We go downstream from the pool for about 100 m to the place where the path coming down from the hamlet of Escuain crosses the river. We take this path to the left and come back up to the car on our access path.

Automatisch importiert von Descente-Canyon.com für Canyon Escuain (inferior) Magnifique canyon, parfait pour l'initiation. Fait par le Lugar dont l'interdiction prête a interpretation (le canyon fait la frontiére) On a pas sorti la corde dans Escuain, les sauts passent, et celui de la dernière cascade fait au maximum 10m depuis le rappel en rive droite. On a continué par Estaronillo, très beau mais moins intéressant (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/21024/observations.html)

Automatisch importiert von Descente-Canyon.com für Canyon Escuain (inferior) Pour l'accès en enchaînant avec Estaronillo, se garer au bout de la piste carrossable au hameau d'Estaronillo. Emprunter le GR qui traverse la rivière par un pont direction Escuain et le suivre jusqu'à une bifurcation à droite qui descend vers la rivière (environ 30 min de marche). Descendre à la rivière, la traverser et suivre la direction Revilla. Passer les ruines d'un moulin puis prendre un sentier qui part à gauche. On rejoint plus haut le lit de la rivière que l'on remonte jusqu'à une cascade qu'on contourne par un chemin en RD. Le chemin redescend vers la rivière et le canyon commence un peu plus haut au panneau Parque nacional.Peu d'obstacles mais de belles vasques. Grande cascade et son cirque magnifiques. Ça vaut le coup d'enchaîner avec Estaronillo.DC - (Quelle: https://www.descente-canyon.com/canyoning/canyon-debit/21024/observations.html)
