Specialities:

Gear:
Ropes: 2x 40m

Summary: (machine translated)
Hard to imagine a now year-round dry canyon, but that's rappeling in two giant whirlpools (but the Rio Vero may have created them)

Hydrology:

Access: (machine translated)
From Barbastro in the direction of Alquézar. After about 20 km on the newly expanded A 1232 at the junction before the bridge of the Rio Vero (righthand side old arch bridge - beyond the bridge Camping Rio Vero) turn right and continue on the A 2205 via Colungo in the direction of Arcusa, Ainsa. The road now winds curvaceously northward. One crosses the Bco Palomeras Fornocal (8.1 km from Rio Vero - bridge) and reaches a few hundred meters further the Puente de las Gargantas over the Rio Fornocal. The route continues with many bends. After 15.7 km (from Rio Vero) we pass the parking lot for the access to the Fornocal), after 16.7 km we arrive at the parking lot above the Portiacha (From the road the slope left away to the plateau).

Approach: (machine translated)
From the car in the direction of SSW to the edge in the channel above the first rappel.

Tour: (machine translated)
2 larger rappels in an impressive setting. In between, another small rappel and a short walking passages.

Return: (machine translated)
Still above the streambed of the Rio Vero, a path crosses along the slope to the north. In the bed of the Rio Vero up to the small dam. Then, keeping to the right, in an arc across the Argatin up to the parking lot.
