Hydrology:

Access: (machine translated)
Situated in Roquetes we will take the road of Els Ports that leads us to Caro.
We will not go up to the peak but we will take the Fredes track that leads to the shelter and the Cova de Avellanes. We leave behind the shelter, the recreational area of the Cova de Avellanes, soon we have a detour to the left, to the right we would go to the Gubies de Regatxol. A kilometer and a half after the recreational area we reach a fork with a track in poor condition on the left. Here we will park.

Approach: (machine translated)
By the track on the left we will go up to 1030m just after some curves. In the left curve over the ravine we will see some milestones to go down to the riverbed.

Tour: (machine translated)
Simple, the final part is spectacular.

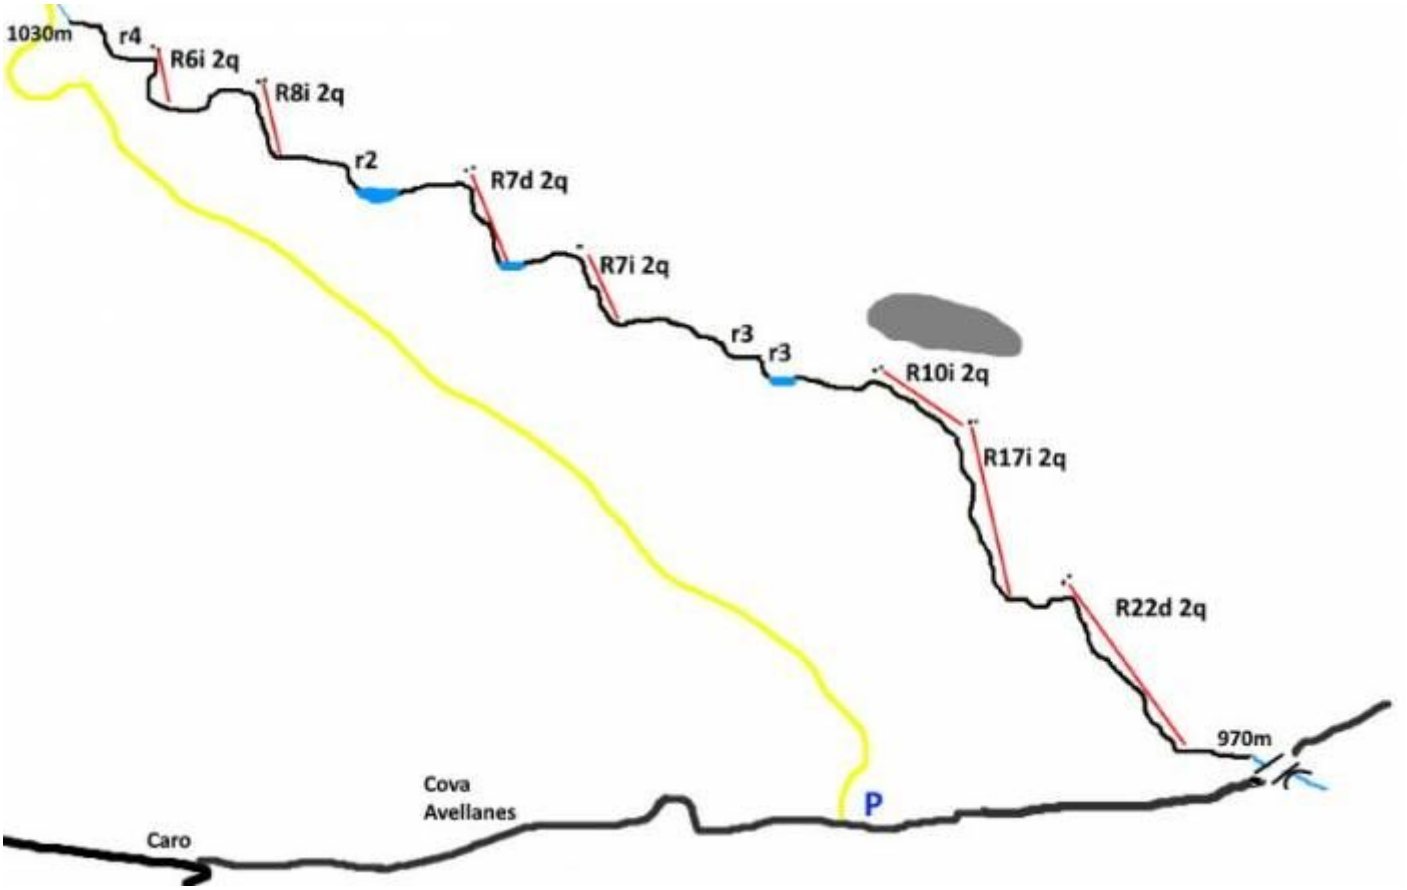

Return: (machine translated)
We go out to the track where we parked, turn right and in 2 minutes we are in the car.
