Season: March - November	**Orientation:**	**Best Time:**
Rating: ☆ 0 ()	**Info:** ★ 0 ()	**Belay:** ★ 0 ()

Specialities:

Gear:

Summary: (machine translated)
Continuation of the Coto de Boi Superior, in this case more aquatic, long and vertical. Very sporty with the majority of the facilities in natural (to foresee tapes and cords). Attention to the waterfall of 90m fractioned.

Hydrology:

Access: (machine translated)
We will have to be located in Arouca, in the province of Aveiro.
From here we head towards Moldes on the CM1251 and follow this road south through Bustelo, Adaufe/Espinheiro and the next river is the Coto Boi. Here we would leave the access car if we have two.
With the return car or if we only have one in Moldes we should take the CM326 to Fuste and park past the river Moldes.
There is a track that goes up from Fuste to the access, we could go up there with the car.

Approach: (machine translated)
If we have only one car we will have to go up the track that goes up from Fuste to the headwaters, when we reach the road we go to the riverbed.
With two cars it is almost immediate

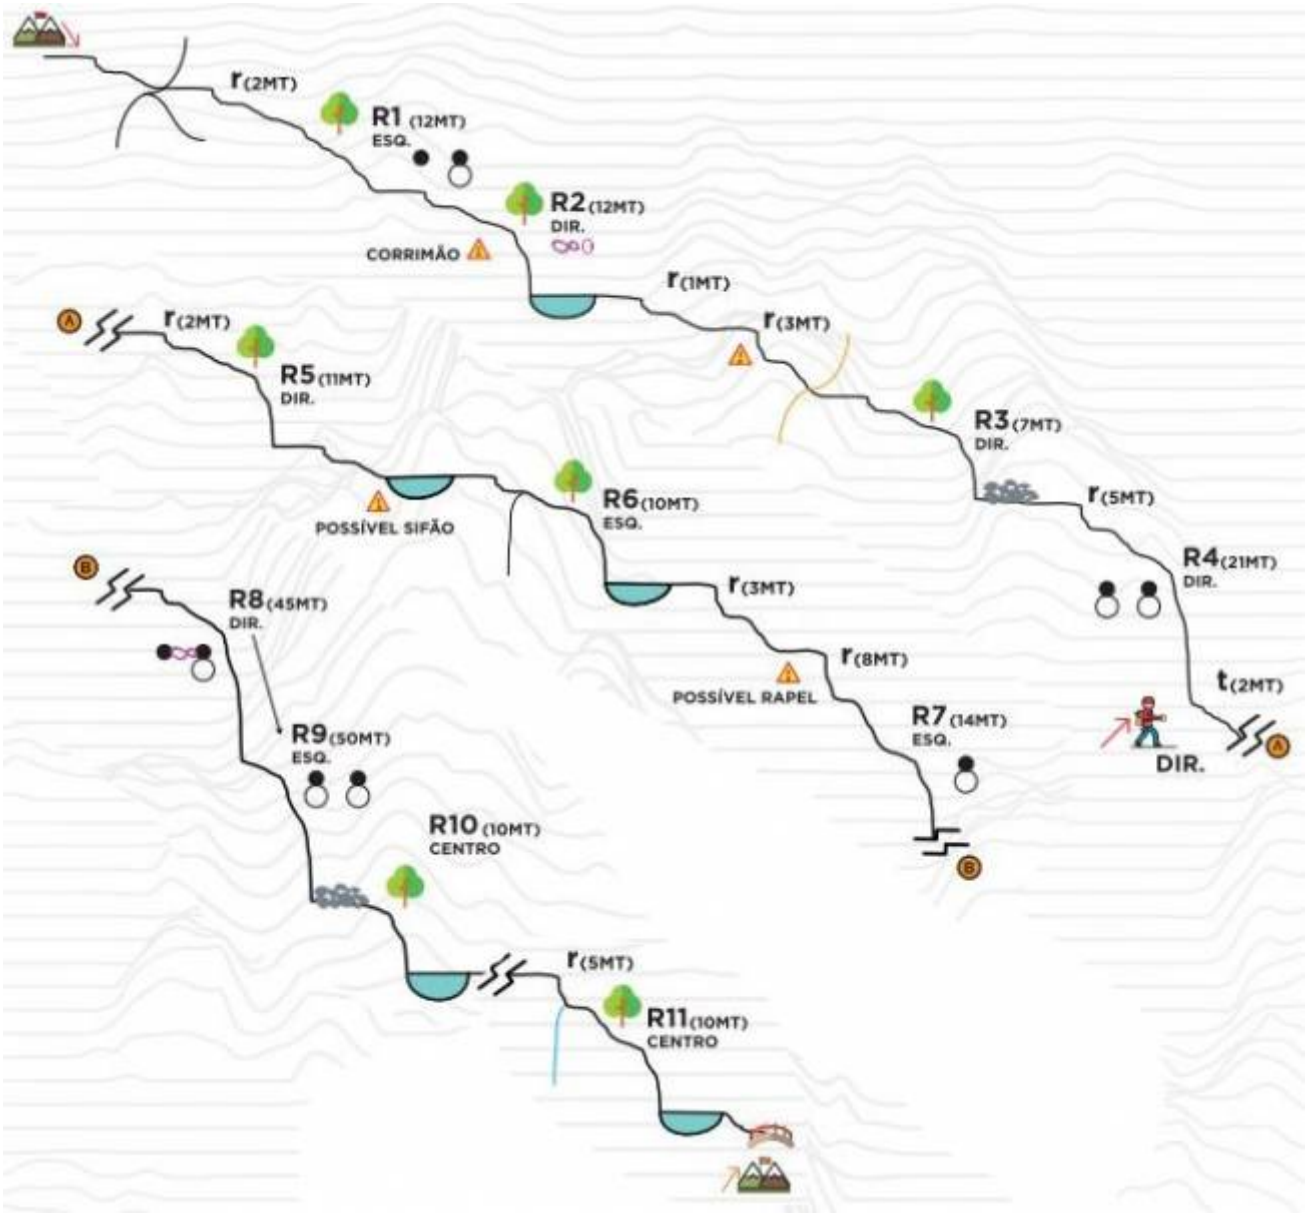

Tour: (machine translated)
See topo
First part more open and with avoidable rappels by the margins. Little by little the ravine will be boxed in until it reaches the long waterfall.

Return: (machine translated)
When we get to the Moldes River, we will take the track that crosses the river.
