Summary: (machine translated) Long canyon with hiking trails, but also high rappels		
Hydrology:		
Access: (machine translated) From Nice on the D 2204 up the Vallon de Paillon about 20 km, at Escarène continue in the direction of Col de Braus, Sospel. Via Touèt de l'Escarène you come to St. Laurent. Here you leave one vehicle. With the other one you drive about 4-5 km further up to a prominent left turn at a little over 900 m above sea level. Park the second vehicle next to a side road.		
Approach: (machine translated) From the car, continue along the slope until you reach the first (35m) rappel point on the right at the break-off.		
Tour: (machine translated) Scenic tour with a C 35 at the start and a top abseil later (C 40). However, the stream from St Laurent onwards is polluted, which also speaks in favor of making a good water flow a prerequisite for an ascent. You can also descend further to Touèt de l'Escarène; here the attraction consists of a nice slide and numerous car wrecks. Then leave the lower vehicle at the north-eastern end of Touèt de l'Escarène and get out about 800 m before reaching the village, at about 470 m above sea level, onto a path on the left bank that leads to the village.		
Return: (machine translated) After the 40 m rappel, continue downstream until you can exit at a bridge on the left and climb along a side stream of the Redebraus on a path to a small road that leads back to the left after 1 km to St. Laurent.

Automatisch importiert von Descente-Canyon.com für Canyon Redebras Dc- fait l'integral (départ au pied du rappel sec à la fin de la piste) le gros éboulement ne gêne pas la progression. Même si le tout début est moyen il y a de beaux passages quand même dans cette première partie. Ensuite magnifique grande cascade qui fait un petit peu moins que 45m mais il faut effectivement prévoir au moins 50m pour le rappel de corde et c'est tout bon. La suite est longue (jusqu'à la deuxième passerelle) car il n'y a plus grand chose à part quelques petits sauts et tob mais la couleur de l'eau et les vasques reste très belles. Merci à la famille pour la navette !!Équipement correct! (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2926/observations.html>)

Canyon suitable for early season, nice initial dry rappel, some worthy sections with less interesting sections; lower part with nice pools some diveable. Anchors to be improved but sufficient. Beware of dogs in the middle section on some unfenced private land. (machine translated)

Automatisch importiert von Descente-Canyon.com für Canyon Redebras Tout bon. pour éviter la descente après la dernière C40, un point pourrait être renouvelé (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2926/observations.html>)

Automatisch importiert von Descente-Canyon.com für Canyon Redebras Ce canyon vaut toujours le coup malgré le manque d'eau. Le départ est sec avec quelques vasques encore claires, puis on trouve assez rapidement de belles vasques bleues, des sauts, et de beaux rappels sur la première partie. Magnifique C45 au soleil. La seconde partie est plus "touristique" et moins intéressante. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2926/observations.html>)

Automatisch importiert von Descente-Canyon.com für Canyon Redebras Ça vaut pas vraiment le coup de partir de tout en haut. Ni de continuer trop loin. Partir de saint laurent, se mettre à l'eau, descendre la C45, profiter de la suite pendant une petite heure, et rejoindre le chemin de sortie quand vous voyez la passerelle en bois. C'est court mais très beau. (Quelle: <https://www.descente-canyon.com/canyoning/canyon-debit/2926/observations.html>)
