Specialities:

Gear:

Summary: (machine translated)
Hoping that someday such an arbitrary ban will be lifted... nice descent to combine with the Hoz de Mildón. A single narrow pass with the need to belay on the left due to the strength of the current in this narrowness. In summer it is possible to climb without rope with great care.
In case of high flows you have to be very careful.
Prohibited for being inside the National Park of Picos de Europa.

Hydrology:

Access: (machine translated)
Getting to Arenas de Cabrales on the AS-114 road
Towards Panes, almost arriving at the p.k. 37, a soft left curve, the bridge, the village,... we park here.
In case the regulation changes one day and access is possible, we would have to go up towards Oceño for almost 2kms, at the third left fork, soon after, a track comes out on the right. Here is the access car.

Approach: (machine translated)
Bcos Caleyón, Mildón and access to part outside the park.
We will follow the track that turns into a path, it goes halfway down the slope about 100m above the riverbed.
Upon reaching the rocky area, after overcoming the most channeled area, go down the rocky area.

Tour: (machine translated)
In the upper section there is little unevenness and some marmites and blocks, little depth and rocks to avoid in the jumps.
Only one area in which to be cautious, in the narrows, with installation to the left.
After this badina, slide and rappel. The riverbed opens up and we continue towards the Hoz de Mildón.

Return: (machine translated)
From Mildón:
We pass under the road, cross the Cares and head to the footbridge to cross the river to the road.
