Summary: (machine translated)
Rappel canyon with slippery ground

Hydrology:

Access: (machine translated)
From Sondrio, take the SS 38 eastwards in the direction of Tirano, Bormio. After 16.5 km we reach Tresenda and turn right over the Adda ("Passo Aprica"). After a further 170 m, turn right again and a little later left again into Via Falck. Here we head south ("Centrale Elettrica Belviso"). Before reaching the premises of the power plant, turn right towards the landfill site and immediately left again towards the slope. Follow the track along the foot of the slope until you reach the torrent. Park the first car here in a suitable place.\nWith the second car, drive back over the Adda and towards Sondrio. We stay on the SS 38 for almost 4 km (from Tresenda) and then turn left again across the Adda towards Carona, Bondone. First in a southerly direction to San Sebastiano, the road then climbs eastwards in serpentines. After 5.6 km (from the Adda bridge) you come to a prominent hairpin bend to the right (790 m a.s.l.).From here you can take the forest path to the nearby Bondone and find a lower access to the stream at Ponte Tripol.\nFor the normal access, continue uphill on the tarred road for another 2 km and park the second vehicle near the road bridge over the Bondone (just before reaching the hamlet of Luscio) (925 m a.s.l.).

Approach: (machine translated)
In each case directly into the streambed.

Tour: (machine translated)
After 10 rappels you reach the Ponte Tripol (lower access). After another 20 rappels, you can exit to the right before the service bridge (480 m above sea level). Then there are another 4 rappels to the exit of the canyon. The rock in the watercourse is very slippery and rarely polished.

Return: (machine translated)
In the open streambed down to the slope.
