Angerschlucht

Angerbach

Create: 2024-09-02 19:07:48	**Update:** 2025-06-27 13:23:47	**Print:** 2026-10-31 11:10:09
Country: Österreich / Austria **Region:** Salzburg **Subregion:** Bezirk St. Johann im Pongau **Town:** Bad Gastein		
Difficulty: a little difficult	**Grading:** v3 a4 IV	**Total time:** 3h25
Approachtime: 50min	**Tourtime:** 2h30	**Returntime:** 5min
Altitude entry: 1020m	**Altitude exit:** 870m	**Delta Altitude:** 150m
Canyon length: m	**Highest rapell:** 40m	**Amount rapells:** 8
Transport: Car optional	**Rock type:**	**Drainage area:** 35.00km²
Season: July - November	**Orientation:** East	**Best Time:**
Rating: ☆ 3.8 (2)	**Info:** ★ 2 (2)	**Belay:** ★ 1 (2)
Specialities:		
Gear: Ropes: 2*40		
Summary: (machine translated) A Tauern stream with some very beautiful highlights, but unfortunately also longer, arduous walking passages in between. Please note: there is a power station above that is automatically regulated. The Angerbach has a relatively large catchment area. Only go after several days without rain and in safe conditions - not during the melting period.		
Hydrology: (machine translated) Catchment area of over 35 km², with a discharge for a power plant that is automatically controlled.		
Access: (machine translated) From Hofgastein drive in the direction of Bad Gastein. After the traffic circle 'Bad Hofgastein Süd' turn right at 'Café Schneidiges' and continue in the direction of Hartl. Shortly before the first hairpin bends there is the possibility to park 1-2 vehicles at the roadside. Alternatively, you can take a second vehicle to the Angertal lift station and start from there.		
Approach: (machine translated) You can either start from the parking exit or from the Angertal parking lot in the direction of Hartl. Above Hof there is a small path that leads to a pasture. Afterwards, the trail leads cross-country through the forest in a northerly to north-easterly direction		
Tour: (machine translated) You start with a walking passage through difficult terrain (slippery, block climbing, lots of trees) to reach the first abseil points. This is followed by three beautiful rappels, all of which are shorter than 20 meters. On the last rappel, you can ideally slide down on the left side into a very deep pool. This is followed by another arduous walking passage to the next steeper part. This begins with a jump or a slide or rappel (a saw is recommended to clear the slide of obstacles). This is followed by another 4-5 rappels. The first complete ascent took place in 2021, and there have been no known repeats since. In any case, you should take sufficient equipment with you. Unfortunately, I no longer know the exact lengths of the abseils, but I estimate the longest abseil to be around 25 to 35 meters. I therefore recommend taking two ropes with a length of 40 meters.		
Return: (machine translated) Get out on the right and walk a few meters across a private property to the car.		

Coordinates:
Canyon Start 47.1440 13.0969
Canyon End 47.1501 13.1050
Parking at Exit 47.1501 13.1055
Parking at Entry 47.1333 13.0828

Reports:

2026-10-30 | Florian Heufler | ☆ ☆ ☆ ☆ | 🕮 ★ ★ | ⚓ ★ | Low | Completed
If you descend to the northeast, as described in the approach guide, you'll end up below the first three rappellers—it's better to descend toward the west! We've placed two new anchors, so the lower section of the canyon—starting from the second walking passage—is adequately secured; a topographic view will follow as soon as we've climbed the upper section as well! The lower section poses some water-related hazards that can lead to problems when water levels are high (backflow and scouring). 2 people: 1 hour 45 minutes from the first car to the second car (machine translated)
