Gear:

Summary: (machine translated)
Orograf. right side stream of the Rio Lavarie, Nicely grinded out with about 7 rappel.

Hydrology:

Access: (machine translated)
How to get to Rio Lavarie: "Leave the A 23 from Villach to Udine at the "Carnia" exit in the direction of Tolmezzo. After almost 1000 m and a traffic circle, you reach the SS 52, but do not follow it in the direction of Tolmezzo, but turn right onto it. Continue north-east for approx. 3200 m, then take the SS 13 and drive north-east (Chiusaforte, Tarvisio) for about 2 km until you reach the possibility to leave the SS 13 on the righthand side before the valley of the Rio Lavarie and park the lower vehicle on the old road.
Take the second car back past the stores and the hotel in the direction of Udine. You will immediately come to the houses of Carnia. Here in the village, turn the car around and drive north again on the SS 13 until you can turn right (turning left from the original direction of travel is prohibited at this point). At the next T-junction, turn right and drive up the hairpin bends to Tugliezzo and continue straight on. The road makes a hairpin bend to the right and a few hundred meters further on you cross the Rio Lavarie. There is a parking area on the left shortly after the bridge."

Approach: (machine translated)
First, as for Rio Lavarie: "From the car on the road back over the bridge. A few meters further, on the right, a track (barrier at the beginning) leads into the sparse forest. Walk this and it leads to the streambed exactly where the constriction begins." Here we cross the Rio Lavarie and climb up the far bank. We come across the indistinct remains of the old road here and follow it in an easterly direction. We cross two rivulets and follow the third down to Rio Barbar (entry).

Tour: (machine translated)
After the boulder field, follow the mostly dry streambed for about 200m, then you come to the first pools that can be downclimbed or slid depending on the water depth. After a rappel from a tree on the right for about 5m, a rappel follows 20m to the right in a narrowing canyon. A short walking passages leads to a 3m jump and 2 more rappels (1x10m left from the tree and 1x15m right from the rock). After that comes a big clamping block and a short walking passages with 5m slide. On the next 5m rappel left follows a small rappel/downclimb of 3m which ends in a large pool (meeting with Rio Lavarie).

Return: (machine translated)
Continuation in Rio Lavarie inevitable. See there!
