Summary: (machine translated)
Water-poor rappel canyon down to the Cinca reservoir

Hydrology:

Access: (machine translated)
From Graus, 1.9 km north on the A-139. Just before the bridge over the Rio Esera, we turn left on HU-V-641. Passing the village of Panillo, after a total of 11.5 km, we reach the Collado de Pano (960 m a.s.l.) with the Ermita de la Virgen de la Collada. From here we descend in a southerly and later westerly direction towards the Cinca reservoir. At the beginning on a decent road, later even on tarred surface we come down to the ruined houses of the former village Lapinilla (638 m a.s.l.).The road down to the canyon is tarred since 2008. So also shuttle possible (park lower vehicle in front of the iron gate).

Approach: (machine translated)
From the tarred road on a dirt road through the ruins of Lapenilla down to the rock cut.

Tour: (machine translated)
10 rappel;
Best done after abundant rainfall. The last high rappel requires 2x25 m of rope, because the anchor is set back.

Return: (machine translated)
Ascent on foot via the road on the left (i.e. south of the canyon) or, more attractively, on the right via a footpath that runs north of the canyon behind the rocky bar up to Lapenilla (village). To do this, go down to the track that runs parallel to the shore of the reservoir and follow it northwards until it bends to the east at a house. Immediately after the bend, the footpath begins on the right, going uphill (signposted).
