Be careful to be in the right stream, a lot of sources have confusion with the starting point and it's easy to swap out Malenscek and Volarja. We thought we were in Volarja, but it was Malenscek. A rather boring walk in a stony stream, first abseiling about 30m in a mossy waterfall, then a few meters of abseiling and the end is the Malenscek waterfall with 104m, the belay is really exposed by several moving screws, 100m of rope was enough, the abseiling is really exceptional, because mostly in the overhang.
