País: España / Spain **Región:** Aragón **Subregione:** Huesca **Ciudad:** Colungo		
Dificultad: no tan difícil	**Grado:** v3 a2 IV	**Tiempo total:** 4h55
Tiempo acceso: 45min	**Tiempo tour:** 4h	**Tiempo regreso:** 10min
Altitud de entrada: 800m	**Altitud de salida:** 605m	**Altitude delta:** 195m
Longitud del cañón: 3100m	**Rapel más alto:** 12m	**Cantidad rapells:** 10
Transporte:	**Tipo de roca:**	**Zona de entrada:** km²
Temporada:	**Orientación:** Sur	**Mejor época:**
Clasificación: ☆ 3.7 (7)	**Información:** ★ 2.5 (6)	**Belay:** ★ 2.6 (5)

Especialidades:

Equipo:
Cuerdas: 1x30m

Resumen: (traducción alternativa)
Long, complex and varied hike and rappel canyon.

Hidrología:

Acceso: (traducción alternativa)
From Barbastro in the direction of Alquézar. After about 20 km on the newly extended A 1232, turn right at the junction before the Rio Vero bridge (old arched bridge on the righthand side - beyond the Rio Vero camping bridge) and continue on the A 2205 via Colungo in the direction of Arcusa, Ainsa. The road now winds its way northwards. Cross the Bco Palomeras Fornocal (8.1 km from Rio Vero bridge) and a few hundred meters further on you will reach the Puente de las Gargantas over the Rio Fornocal. Here we can park our first car on the left before the bridge.
With the second, we continue along the many bends. After 15.7 km (from Rio Vero) we reach the point where a forest road branches off to the right. We can park our second car at the beginning of the forest road.
* http://www.wikiloc.com/wikiloc/view.do?id=4917385

Acceso: (traducción alternativa)
We walk up the forest road, after 900 m another slope joins from the right. 600 m further on, we ignore a forest road that branches off to the left here. Our forest road now describes a long right-hand bend. Another 900 m further on, the sloping forest road makes a sharp left turn (at a right angle).
Here, from the slope in a southerly direction in or next to a small streambed (dry - labeled "torrentera" in Salamero, map sketch p. 290), you can access the Fornocal via a short route exactly where it bends from an east-west direction at a right angle to the south, cf: * http://www.wikiloc.com/wikiloc/view.do?id=2807615 . Follow the path to a dry streambed, where the clear path leads upwards to the right to the Cueva de Muriecho, a cave niche with rock paintings (worthwhile 5-minute detour). Continue the descent on climbing tracks through the partly thorny dry bed until you reach the Fornocal with three abseils (10m, 5m, 8m).

To get to the usual access, continue along the slope and after another 250 m you will come to an inconspicuous dry streambed, which you follow to the streambed of the Fornocal, cf: * http://www.wikiloc.com/wikiloc/view.do?id=130094

Recorrido: (traducción alternativa)
First we walk along the largely flat streambed for quite some time until we reach the first rappel under the large boulder. From here, we start a varied tour with narrow sections, clamping blocks, small rappels, a grotto, a spring, sinter overhangs and a natural arch, to list just a few of the interesting moments. Towards the exit, longer sections await us until the bridge arch becomes visible high above us.

Regreso: (traducción alternativa)
50 m after the bridge we climb following the tracks on the right up to the bridge and the car.

Coordenadas:
Inicio del Cañón 42.2108 0.0730
Final del Cañón 42.1899 0.0601
Aparcamiento a la salida 42.1903 0.0606
Aparcamiento a la entrada 42.2104 0.0468
Salida Alternativa del Cañón 42.2092 0.0677

Automatisch importiert von Descente-Canyon.com für Canyon Fornocal Toute la première partie est impraticable du fait des vasques remplies d'eau croupies et de cadavre de vautour. Après le premier resserrement on retrouve un fin filet d'eau coulant . équipement un peu vieillissant mais en relatif bon état , formation géologique très belle , à faire et refaire au printemps .PS: un de ses Affluents , le Sarratanas , est également à sec mais peu se parcourir car les vasques peuvent aisément s'éviter . The canyon is dry for the first hour. After that, it ripples slightly at around 2l/s. The middle section is just fine. It will probably be dry in about a week. (traducción alternativa)
